

Q.22 Discuss the safety devices and stop motion used in a speed frame.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

Q.23 Describe the construction, working and passage of material through a modern comber machine with neat sketch.

Q.24 Explain the principle, working and types of auto leveller used in modern draw frames.

Q.25 Explain the construction and working principle of a speed frame with a neat labelled diagram.

No. of Printed Pages : 4

Roll No.

222742

4th Sem/ Textile Technology Subject : Spinning Technology = II

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

Q.1 The drafting system in a comber works on the principle of:

- a) Equal roller speeds
- b) Differential roller speed
- c) High temperature
- d) None of these

Q.2 The top comb mainly helps to:

- a) Insert twist
- b) Draft fibres
- c) Remove short fibres
- d) Wind sliver

Q.3 Roving is wound on:

- a) Cone
- b) Bobbin
- c) Cop
- d) Cheese

Q4. In a closed loop auto leveller, correction is made:

- a) After measuring delivery sliver
- b) Before drafting
- c) Manually
- d) None of these

Q.5 Speed frame is also known as:

- a) Simplex
- b) Ring Frame
- c) Canding machine
- d) Draw frame

Q.6 Speed frame come after:

- a) Ring frame
- b) Weaving
- c) Draw frame
- d) Winding

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

Q.7 The process of combining two or more slivers together is called_____.

Q.8 Define open loop auto leveller.

Q.9 Define finisher draw frame.

Q.10 The output delivered from the comber is known as _____.

Q.11 Name the process carried out in a comber.

Q.12 The device that automatically controls sliver weight variation is called_____.

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

Q.13 Explain the objectives of sliver lap machine.

Q.14 Describe the passage of material through a comber.

Q.15 Write the nomenclature and functions of various parts of a comber.

Q.16 Discuss the importance of stop motions in a modern draw frame.

Q.17 Explain open loop and closed loop auto leveller systems.

Q.18 Explain the bobbin drive mechanism in a speed frame and its importance in winding.

Q.19 Explain lap formation process in sliver lap machine.

Q.20 Explain the importance of doubling in the sliver Lap process.

Q.21 Write Difference between Breaker and Finisher draw frame.
