

6th Sem/ Textile Technology
Subject : Textile Testing - II

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

- Q.1 Pilling is defect of fabric which affect the _____ of fabric.
- a) Strength b) Appearance
c) Weaving d) Fall
- Q.2 Which instrument is used for rubbing fastness?
- a) Twisttester
b) Crock meter
c) Bisley balance
d) Shirley stiffness meter
- Q.3 Bending length is _____ evaluation of fabric handle.
- a) Stiffness b) Colour
c) Weight d) Twist
- Q.4 Important property of a _____ fabric is the fastness of shade.
- a) Knitted b) Woven
c) Dyed d) Singed

- Q.5 Which fabric will give you highest abrasion resistance _____.
- a) Nylon b) Polyester
c) Acrylic d) Lycra
- Q.6 Sample size in cut stripe method of tensile strength is _____.
- a) 60mm x 300mm b) 6mm x 3mm
c) 10mm x 20mm d) 50mm x 200mm

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

- Q.7 Differentiate between hydraulic and mechanical bursting test?
- Q.8 Define Pilling of a fabric?
- Q.9 If EPI = 59, and warp count = 36 Ne, calculate Warp cover.
- Q.10 What do you mean by water vapour permeability?
- Q.11 Give sampling size in case of crease recovery.
- Q.12 What is rubbing fastness?

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

- Q.13 How sampling of fabric is done for tensile strength testing?

- Q.14 How will you determine the washing fastness of a fabric
- Q.15 What are the precautions to be taken while taking fabric sample?
- Q.16 Define drape? Explain the procedure of drape meter.
- Q.17 How crease recovery of fabric is tested? Explain it.
- Q.18 What is serviceability of a fabric. What is the purpose of serviceability testings?
- Q.19 Why wettability is important? How it is evaluated?
- Q.20 How the pilling resistance of a fabric is evaluated?
- Q.21 Explain the method of colour fastness to washing.
- Q.22 What is GSM. How will you calculate the GSM of a circular fabric having diameter 12cm. (sample weight = 10 gm)

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

- Q.23 How stiffness of fabric is calculated? Give using bending length.
- Q.24 What is air permeability and air resistance of a fabric. How will you measure the air permeability of a fabric by using air permeability tester.
- Q.25 What is tearing strength? Give the procedure with instrument for tear strength tester.
