

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

- Q.23 Explain the process flow with the help of neat diagram of Polyester fibre production in detail.
- Q.24 With the help of a neat sketch, show the passage of material rotor spinning machine. Explain its working principle also.
- Q.25 Which problems are faced in man-made fibre spinning? What modifications are required in blow room for man-made fibre processing?

No. of Printed Pages : 4

222763-A

Roll No.

6th Sem/ Textile Technology Subject : Advanced Yarn Manufacturing

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

- Q.1 What is the main advantage of air-jet spinning?
- a) High productivity
 - b) Low energy consumption
 - c) High yarn strength
 - d) All of the above
- Q.2 TM stands for
- a) Time Management
 - b) TOW Manufacturer
 - c) Twist Multiplier
 - d) Two Machines
- Q.3 What is the principle of friction spinning?
- a) Using a rotor to spin fibers into yarn
 - b) Using a jet of air to spin fibers into yarn
 - c) Using a friction device to spin fibers into yarn
 - d) Using a ring to spin fibers into yarn

- Q.4 Air vortex spinning count range
- a) Ne 7.5-30 b) Ne 120
- c) Ne 125 d) Ne 145
- Q.5 What is the main purpose of post spinning operations in man-made fiber / Filament production?
- a) To improve yarn strength
- b) To improve yarn texture
- c) To improve fiber orientation
- d) All of the above
- Q.6 Neps of fibers are remove in _____ process.
- a) Carding b) Draw frame
- c) Simplex d) Ring frame

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

- Q.7 Rotor is made of _____.
- Q.8 Production rate in Airjet spinning is _____.
- Q.9 Blending is the _____ of two different fibers.
- Q.10 The yarn will be finer in Ring spinning / Airjet spinning _____.
- Q.11 Count range in Airjet spinning is _____.
- Q.12 What are the RPM of rotor in rotor spinning?

(2)

222763-A

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

- Q.13 Write the short note on wet spinning with diagram.
- Q.14 What is the requirement for blending of fibres?
- Q.15 What is the effect of fibres length on yarn's properties?
- Q.16 Write the physical and chemical properties of polyester fibre.
- Q.17 Explain the working principle of friction spinning system.
- Q.18 Draw a flow diagram fo manufacture for viscose rayon.
- Q.19 Write the important fibre properties required for friction spinning.
- Q.20 Which kinds of problems are faced in man-made fibre spinning?
- Q.21 What is the concept of Heat setting? Give the name of heat set fibres.
- Q.22 Compare dry spinning with wet spinning.
