

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

Q.23 Write the various steps of development of a program in detail. (CO1)

Q.24 Differentiate between while, do-while and for loop with example. (CO2)

Q.25 What are the various types of operators in C. Explain in detail. (CO2)

No. of Printed Pages : 4

223815

Roll No.

1st Sem / Artificial Intelligence & Machine Learning

Subject : Programming Through C

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

Q.1 Which flowchart symbol is used to denote a decision point? (CO1)

- a) Circle b) Diamond
- c) Rectangle d) Parallelogram

Q.2 Which of the following are themselves a collection of different data types? (CO5)

- a) String b) Structures
- c) Char d) None of the above

Q.3 Which data type is used to store a single character in C? (CO2)

- a) int b) float
- c) char d) double

- Q.4 What is an example of iteration in C? (CO2)
- a) for b) while
c) do-while d) all of the mentioned
- Q.5 If the two strings are identical, then strcmp() function returns (CO3)
- a) -1 b) 1
c) 0 d) True
- Q.6 What does the %d format specifier in printf() represent? (CO2)
- a) Double b) Integer
c) Character d) String

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

- Q.7 In C array indexing starts from _____ (CO3)
- Q.8 Define a variable. (CO2)
- Q.9 Define typedef. (CO5)
- Q.10 Full form of PDL is _____. (CO1)
- Q.11 Write down syntax of for loop. (CO2)
- Q.12 A function can have more than one return statement. (T/F). (CO2)

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

- Q.13 Differentiate between Local and Global variable. (CO2)
- Q.14 Explain how elements of a single dimensional array can be read and display in C. (CO3)
- Q.15 Explain various arithmetic operators in C. (CO2)
- Q.16 Define flowchart. What are the various symbols used in flowchart. (CO1)
- Q.17 Define data type. Explain various basic data types in C. (CO2)
- Q.18 Differentiate between Compiler and Interpreter. (CO1)
- Q.19 Explain any two in-built string functions. (CO2)
- Q.20 Define a pointer. How it is declared. Explain reference and dereference operators. (CO4)
- Q.21 How the elements of structure are accessed. Explain with example. (CO5)
- Q.22 What are various decision making statements in C. Write down the syntax of if-else statement. (CO2)
