

- Q.20 What are various OLAP operation? (CO2)
- Q.21 What are the functions of data warehouse? (CO1)
- Q.22 What do you mean by concept hierarchy generation? (CO4)

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

- Q.23 What is a Data Warehouse? Explain its characteristics, benefits and applications in detail. (CO1)
- Q.24 Explain the steps involved in Data Mining in detail with a suitable diagram. (CO3)
- Q.25 Explain various clustering techniques in detail. Also discuss its applications. (CO4)

No. of Printed Pages : 4
Roll No.

6th Sem/ Artificial Intelligence & Machine Learning Subject : Data Warehousing & Data Mining

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

- Q.1 The important feature of the data warehouse is that it is _____. (CO1)
- a) Subject-oriented b) Time-variant
c) Integrated d) All of the above
- Q.2 What does OLTP stand for? (CO2)
- a) Offline Transaction Processing
b) Online Transaction Processing
c) Outline Traffic Processing
d) None of the above
- Q.3 Data about data is called _____. (CO1)
- a) Table b) Database
c) Metadata d) Integration

- Q.4 What is the main goal of a data warehouse? (CO3)
- a) To optimize data entry processes
 - b) To store operational data
 - c) To support decision-making and business intelligence
 - d) To manage unstructured data
- Q.5 In the context of data warehousing, "time-variant" means (CO1)
- a) Data is updated in real-time
 - b) Data is linked to a specific time period
 - c) Data is refreshed periodically
 - d) Data is normalized over time
- Q.6 Dimensionality reduction reduces the data set size by removing____. (CO4)
- a) Relevant attributes b) Irrelevant attributes
 - c) Derived attributes d) Composite attributes

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

- Q.7 What is MOLAP? (CO2)

(2)

223864-C

- Q.8 What is data cleaning? (CO3)
- Q.9 What is an Association rule? (CO4)
- Q.10 What is a Data Mart? (CO1)
- Q.11 What is KDD process? (CO4)
- Q.12 Define clustering analysis. (CO4)

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

- Q.13 Compare and contrast ROLAP, MOLAP and HOLAP. (CO2)
- Q.14 What is the difference between operational database and data warehouse? (CO1)
- Q.15 Explain any frequent item set mining Algorithm in brief. (CO4)
- Q.16 What do you mean by data preprocessing? What is its need? (CO3)
- Q.17 What are major issues in data mining? (CO1)
- Q.18 What do you mean by data integration and transformation? (CO4)
- Q.19 Explain star schema and fact tables in brief. (CO3)

(3)
