

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

- Q.23 Explain the principles and mechanisms of user authentication. Discuss at least two password attacks. (CO1)
- Q.24 Explain intrusion detection systems with a comparison between HIDS and NIDS. (CO4)
- Q.25 Describe symmetric and asymmetric cryptography. Explain DES and RSA algorithms. (CO3)

No. of Printed Pages : 4

223864B

Roll No.

6th Sem/ Artificial Intelligence & Machine Learning

Subject : Network and Information Security

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

- Q.1 What is the main goal of cryptography? (CO1)
- a) Data integrity b) Confidentiality
- c) Availability d) All of the above
- Q.2 Which of the following ensures data confidentiality? (CO1)
- a) DES b) RSA
- c) AES d) All of the above
- Q.3 The process of converting plain text into cipher text is called: (CO2)
- a) Decryption b) Hacking
- c) Encryption d) None

- Q.4 Which one is not a type of virus? (CO1)
 a) Worm b) Trojan Horse
 c) Firewall d) Rootkit
- Q.5 Which protocol is used for secure email communication? (CO3)
 a) SMTP b) PGP
 c) HTTP d) FTP
- Q.6 Which standard is associated with information security management systems? (CO4)
 a) ISO 14000 b) ISO 27001
 c) ISO 9001 d) ISO 31000

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

- Q.7 A Trojan horse appears to be _____ software. (CO1)
- Q.8 The full form of DMZ is _____. (CO4)
- Q.9 Digital Certificate is issued by a _____. (CO3)
- Q.10 The process of converting plaintext into ciphertext is called _____. (CO1)

- Q.11 The three main goals of security are confidentiality, _____ and availability. (CO1)
- Q.12 A _____ cipher rearranges characters of the plaintext. (CO2)

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

- Q.13 Explain two common threats to network security. (CO2)
- Q.14 Write a short note on digital forensics. (CO4)
- Q.15 Define spoofing and phishing with examples. (CO2)
- Q.16 Differentiate between viruses, worms, and Trojan horses. (CO2)
- Q.17 What is access control? Explain its types. (CO3)
- Q.18 Write a short note on non-repudiation. (CO1)
- Q.19 Describe three features of ISO 27001. (CO4)
- Q.20 What is the difference between cipher text and plain text? (CO2)
- Q.21 Explain digital forensics and its applications. (CO4)
- Q.22 What is a honeynet? How is it useful in detecting threats? (CO3)
