

- Q.16 What is a correlational research design? Give one simple example related to business or HR.
- Q.17 What is meant by a sample? Why is sampling used instead of studying the entire population?
- Q.18 Explain the difference between probability sampling and non-probability sampling with one example each.
- Q.19 What is a questionnaire? Mention any four guidelines for designing a good questionnaire.
- Q.20 Explain interview method of data collection. Mention any two advantages and two limitations.
- Q.21 What do you understand by data processing in research? Explain editing, coding and tabulation in brief.
- Q.22 List the main parts of a standard research report and write one or two lines about each part.

SECTION-D

- Note:** Long answer type questions. Attempt any two questions out of three questions. (2x8=16)
- Q.23 Explain in detail the steps in the research process starting from problem identification up to report writing.
- Q.24 Explain population, sample need for sampling and factors affecting sample size.
- Q.25 Explain data analysis and presentation in a research study.

**5th Sem/
Business Management (Retail Marketing, HRM)
Subject : Research Methodology**

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

- Q.1 The main purpose of research is to:
- Confuse readers
 - Discover new facts or verify existing knowledge
 - Increase pages in reports
 - Only collect data without analysis
- Q.2 Quantitative research mainly uses:
- Words and images only
 - Numerical data and statistical analysis
 - Poetry and stories
 - Only interviews without any numbers
- Q.3 A descriptive research design is used for:
- Test cause and effect under strict control
 - Describe characteristics of a population or situation

- c) Manipulate variables in a lab
 - d) Only review literature
- Q.4 A population in research means:
- a) Only 10 selected people
 - b) The entire group of individuals about whom the researcher wants information
 - c) Only respondents who answer
 - d) Only teachers in a collage
- Q.5 Stratified sampling means:
- a) Selecting only volunteers
 - b) Dividing population into groups (strata) and sampling from each group
 - c) Selecting only top performers
 - d) Using only online respondents
- Q.6 A closed-ended question in a questionnaire:
- a) Allows free, long answers
 - b) Asks only for yes / no or fixed options
 - c) Has no options
 - d) Is always open to interpretation

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

- Q.7 Fill in the blank:
Research that focuses on understanding meanings and experiences in depth is called _____ research.

(2)

226754A

- Q.8 Fill in the blanks:
A tentative answer or prediction that can be tested through research is called a _____.
- Q.9 True or False:
In probability sampling every member of the population has a known chance of being selected.
- Q.10 True or False:
Questionnaires and interview schedules are examples of data collection instruments.
- Q.11 True or False:
Editing and coding are part of preparing raw data for analysis.
- Q.12 True or False:
A good research report should be clear, logical and well organized.

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

- Q.13 Define research and research methodology. How are they different?
- Q.14 Explain any four characteristics of good research (for example: systematic, objective, logical empirical)
- Q.15 Distinguish between basic research and applied research with one example of each.
