

- Q.30 Write the application of die casting.
 Q.31 Explain the directional solidification.
 Q.32 Explain ultrasonic testing for casting.
 Q.33 Name the various components of press.
 Q.34 Explain three high rolling mills.
 Q.35 Explain the process of wire drawing.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Explain the construction & working of laser welding with neat sketch.
 Q.37 Explain with neat sketch construction & working of pit furnace.
 Q.38 Explain injection molding with the help of neat sketch.

No. of Printed Pages : 4 MSIL-121733/031733
 Roll No.

3rd Sem / Mech. Engg. (MSIL) Sub : Workshop Technology-I

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Melamine is obtain from
 a) Manganese dioxide b) Calcium carbide
 c) Magnesium sulphate d) Calcium sulphate
- Q.2 Extrusion dies are made of
 a) Cast iron b) Mild steel
 c) Tungsten carbide d) H.S.S.
- Q.3 In a four high rolling mil, bigger rolls are called
 a) Working rolls b) Backup rolls
 c) Main rolls d) Guide rolls
- Q.4 In blanking operation, clearance is provided on
 a) Punch b) Die
 c) Both Punch & Die d) None of these
- Q.5 Slag inclusion in casting is a
 a) Surface defect b) Internal defect
 c) Notch d) None of these

- Q.6 Cast iron is manufactured in
 a) Blast furnace b) Pit furnace
 c) Open hearth furnace d) Cupola furnace
- Q.7 Contraction while solidification is compensated by
 a) Gates b) Runners
 c) Ladle d) Risers
- Q.8 In centrifugal casting, core is made of
 a) Sand b) Ferrous metal
 c) Non-Ferrous metal d) None of the above
- Q.9 Laser beam in case of laser welding is provided by
 a) Ruby b) Tungsten
 c) Electric current d) Inert gas
- Q.10 The maximum flame temperature occurs.
 a) At the outer cone
 b) At the inner cone
 c) At the tip of the torch
 d) Between the outer and inner cone

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Spot welding is type of _____ welding.
- Q.12 In DC welding, the straight polarity results in _____.
- Q.13 Write the purpose of consumable electrodes.

(2) MSIL-121733/031733

- Q.14 For welding stainless steel by MIG process, the argon-oxygen mixture gas is used (True/False)
- Q.15 Define Machining allowance.
- Q.16 Name some special molding sand.
- Q.17 Define pressure casting.
- Q.18 Define embossing.
- Q.19 Define the extrusion.
- Q.20 Name any two types of thermo setting plastics.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Explain different types of gas flames.
- Q.22 What are the functions of coating on the electrode?
- Q.23 Define porosity and blow holes defects of arc welding.
- Q.24 Define spot welding? Also mention its few applications.
- Q.25 Explain the principle of operation of seam welding with neat sketch.
- Q.26 Write the advantage of TIG welding.
- Q.27 Write the application of MIG welding.
- Q.28 Explain different pattern materials.
- Q.29 Explain floor molding.

(3) MSIL-121733/031733
