

- Q.28 Describe the working of a vertical cone rice whitener. (CO2)
- Q.29 Describe the different unit operation in Wheat milling process. (CO4)
- Q.30 Describe the working of attrition mill as a grinding machine in animal feed plant. (CO6)
- Q.31 Explain the Batch type solvent extraction process in brief. (CO5)
- Q.32 Name different types of by-products of rice mill and their utilization. (CO2)
- Q.33 What are the various utilization of the bi-product of rice mill? (CO2)
- Q.34 Describe the principle and working of Magnetic separator. (CO1)
- Q.35 Describe the working of machine used for mixing of feed ingredients in animal feed plant. (CO6)

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 List different types of cleaners and graders? Explain the constructional detail and working principle Air screen cleaner-cum-grader. (CO1)
- Q.37 Explain various unit operations of a flour mill. Draw the layout and flow diagram of a flour mill. (CO4)
- Q.38 Describe various components their operation and performance of wheat mill. (CO4)

Subject:- Agro Process Engineering

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 The total quantity of head rice plus broken of all kind after milling is _____ (CO2)
- a) Degree of milling b) Milled rice
- c) Milling yield d) None of these
- Q.2 Specific gravity separator separates the grains on the basis of: (CO1)
- a) Weight b) Length
- c) Sphericity d) Roundness
- Q.3 Mostly the solvent used in oil extraction unit is (CO5)
- a) Nepthene b) n-hexane
- c) n-haptane d) All of these
- Q.4 Yield of oil in extraction process as compare to expression process is : (CO5)
- a) Higher b) Lower
- c) Optimum d) None of these

- Q.5 Which method is not a size reduction method: (CO4)
 a) Cutting b) Shearing
 c) Crushing d) Separating
- Q.6 The process of removing husk from paddy is called: (CO2)
 a) Dehusking b) Separating
 c) Policing d) None of these
- Q.7 Yield of oil in extraction process as compare to expression process is : (CO5)
 a) Higher b) Lower
 c) Optimum d) None of these
- Q.8 The putting a product into package is called (CO4)
 a) Packaging b) Blending
 c) Storage d) Polishing
- Q.9 The Application of chemical on seed is called (CO1)
 a) Seed conditioning b) Seed Washing
 c) Seed treatment d) Seed grading
- Q.10 The process of removing bran layer from paddy kernel is called: (CO2)
 a) Dehusking b) Whitening
 c) Policing d) None of these

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Define Extraction Process. (CO5)

- Q.12 The soaking of paddy in hot or cold water before paddy milling is known as _____. (CO2)
- Q.13 Define polishing. (CO3)
- Q.14 The putting a product into a package is called _____. (CO4)
- Q.15 Define Whitening of rice. (CO2)
- Q.16 Define Delinting of cotton seed. (CO1)
- Q.17 Reduction of food grain into various end products is called _____. (CO4)
- Q.18 CFTRI stands for _____. (CO2)
- Q.19 Define Seed grading. (CO1)
- Q.20 Define Conditioning. (CO3)

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Describe the CFTRI method of parboiling. (CO2)
- Q.22 What is densification of wheat straw and its advantages? (CO6)
- Q.23 Explain the Dry Milling Process of Pulses. (CO3)
- Q.24 Write down various advantages of parboiling. (CO2)
- Q.25 Explain the principle of operation of under runner discshellers. (CO2)
- Q.26 Explain the Mechanical delinting of cotton seeds. (CO1)
- Q.27 Describe the working principle of hydraulic press used for oil. (CO5)
