

- Q.25 Explain need of flywheel.
- Q.26 Define BHP, IHP and FHP?
- Q.27 Write necessity of lubrication system.
- Q.28 Classify IC engine according to cylinder arrangement.
- Q.29 Name the components of cooling system. (CO4)
- Q.30 Explain need of crankcase ventilation. (CO4)
- Q.31 Describe advantages of air cooling systems. (Co3)
- Q.32 Write the names of sensors used in MPFI system. (CO5)
- Q.33 Draw a line diagram of cooling system. (CO3)
- Q.34 Why indicated power is more than brake power? Justify it. (CO5)
- Q.35 Write function and material for piston. (CO2)

SECTION-D

- Note:** Long answer type questions. Attempt any two questions out of three questions. (2x10=20)
- Q.36 Explain principle and working of 4 stroke petrol engine with neat sketch. (CO1)
- Q.37 Describe construction and working of side valve mechanism with neat diagram. (CO2)
- Q.38 Classify types of lubricants and give their examples. (CO3)

Roll No. /030341

4th Sem / Auto Subject:- Auto Engine I

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Compression ratio of SI Engine is
a) 15:1 b) 20:1
c) 9:1 d) 4:1
- Q.2 CI Engine stands for
a) Continuous Ignition
b) Compression Ignition
c) Cycle Ignition
d) None
- Q.3 Stroke of Engine is the
a) Volume of cylinder
b) Length of cylinder
c) Diameter of cylinder
d) Distance between TDC & BDC
- Q.4 A single cylinder which has power stroke in every revolution of crank shaft is called

(1) 180341/170341/120341
/030341

- a) Single Stroke b) Two stroke
c) Three stroke d) Four stroke
- Q.5 Connecting rods are generally of following section
a) I - Section b) Round Section
c) Triangular Section d) Square Section
- Q.6 The quantity of heat lost of the cooling system in IC engine is
a) 10% b) 30%
c) 50% d) 70%
- Q.7 In 2 stroke scooter engine, cylinder is lubricated by
a) Pressure lubrication b) Splash lubrication
c) Mixing Petrol & oil d) None
- Q.8 Ignition coil is used to
a) Step up current b) Step up voltage
c) Step down current d) Step up power
- Q.9 Following is the SI engine
a) Petrol Engine b) Diesel Engine
c) Gas Engine d) None
- Q.10 Lubricating oil
a) Minimize wear b) Keeps parts cool
c) Washes away dirt d) All above

(2) 180341/170341/120341
/030341

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Write full form of BDC.
- Q.12 Compression ratio of Diesel engine is higher than petrol engine. (True/False)
- Q.13 Write full form of EC engine.
- Q.14 Define bore of cylinder.
- Q.15 Write material for cylinder block.
- Q.16 Radiator is the part of _____ system. (Lubrication /Cooling / Ignition)
- Q.17 Define Swept volume.
- Q.18 Write full form of MPFI.
- Q.19 Petrol engine works on _____ cycle.
- Q.20 Write full form of BHP.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Write five difference between petrol engine and diesel engine.
- Q.22 Describe cylinder displacement and engine displacement.
- Q.23 Explain functions of piston rings.
- Q.24 Write function and material for cylinder head.
