

- Q.23 List similarities between glaze and glass.
- Q.24 Describe role of silica and fluxes in glazes.
- Q.25 Define coating. Give examples of ceramic coating.
- Q.26 Name defects of glazes.
- Q.27 List types of decorations. Explain any one.
- Q.28 Why it is important to prepare base metal before enamelling?
- Q.29 Define crawling. Write its causes?
- Q.30 Explain vapour glaze.
- Q.31 List alkali materials used to make glaze.
- Q.32 Explain making of frit.
- Q.33 Explain application methods of enamel and glazes.
- Q.34 Tell the role of ground and cover coat enamelling.
- Q.35 Why ball clay is more plastic than china clay?

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Explain different decoration methods.
- Q.37 Enlist different glaze defects. Explain causes and remedies.
- Q.38 List raw materials of enamel. Explain their role.

No. of Printed Pages : 4

180441/120441

Roll No.

4th Semester/ Ceramic Subject : Ceramic Coating Technology

Time : 3 Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Ceramic Coating is applied to improve
- a) Chemical Interness b) High tem. Stability
- c) Hardness d) All of the above
- Q.2 Identify the non-plastic raw material
- a) Seircite Pyrophyllite b) Talc
- c) Pyrophyllite d) Quartz
- Q.3 Glaze maturing temperature can be reduced by
- a) Reduce silica content
- b) Increase fluxing content
- c) Both A & B
- d) None of the above
- Q.4 Enamels are applied on
- a) Metal surface b) Ceramic surface
- c) Rubber surface d) None of the above

(20)

(4)

180441/120441

(1)

180441/120441

- Q.5 Drying rate depend on
- Humidity
 - Temperature
 - Air flow
 - All of the above
- Q.6 Salt glaze is also known as _____ glaze.
- Lead
 - Super
 - Crystalline
 - Vapour
- Q.7 _____ is form of silica.
- Kyanite
 - Sillimanite
 - Soda feldspar
 - Quartz
- Q.8 During firing wares in the kiln
- Unglazed wares can be kept in contact with each other
 - Glazed ware must be kept apart (Separate) from each other
 - Both A & B
 - None of the above
- Q.9 Which of the following are defects of enamel?
- Under fired
 - Rolling
 - Cracking
 - All of the above
- Q.10 Which of the following is glazing method
- Chromolithography
 - Stamping
 - stenciling
 - Pouring

(2)

180441/120441

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (10x1=10)

- Q.11 Fluxes are added in glazes and not in ceramic bodies. (True/False)
- Q.12 Stenciling is one type of _____ method. (Decoration/Glazing)
- Q.13 Vapour glaze is one type of enamel. (True/False)
- Q.14 Porcelain glaze is double fired glaze. (True/False)
- Q.15 Peeling is one type of glaze defect. (True/False)
- Q.16 Glaze and glass are similar in physical properties. (True/False)
- Q.17 Crazing is found in glazes when coefficient of thermal expansion of body is less than that of glaze. (True/False)
- Q.18 During firing, glazed wares must be kept carefully apart from each other. (True/False)
- Q.19 _____ is one type of decorating. (On glaze, Self glaze)
- Q.20 Crazing the peeling are found after biscuit firing. (True/False)

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Discuss opaque glaze.
- Q.22 Explain ground coat enamelling.
