

b) Boiler

a) Weight density b) Mass density
c) Specific weight d) Specific Volume

Q.4 When the rate of reaction is equal to rate constant, the order of reaction is

- a) Zero order b) First order
c) Second order d) Third order

Q.5 Which of the following is urea formula

- a) $\text{CH}_4\text{N}_2\text{O}$ b) CH_5N_2
c) $\text{CH}_6\text{N}_2\text{O}$ d) None of these

Q.6 What kind of transfer of heat involve while you boil water in the pot?

- a) Evaporation b) Conduction
c) Convection d) Radiation

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

Q.7 Define forced convection.

Q.8 Define free convection and give one example.

Q.9 Dehumidification is _____ of moisture from air.

Q.10 Give one example of irreversible reaction.

Q.11 Write the chemical reaction of urea.

Q.12 Define Mass Transfer.

(2)

180517/030526

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

Q.13 Classify of heat exchanger.

Q.14 Write a note on Elementary and Non Elementary action.

Q.15 Explain various modes of heat transfer.

Q.16 Different between homogeneous and heterogeneous reaction.

Q.17 Explain Fourier's law of heat transfer and also write its equation.

Q.18 What are uses of urea.

Q.19 Write the short note on boiler?

Q.20 What is thermal conductivity and write its units.

Q.21 Classify the equipment used for distillation and drying.

Q.22 What are the properties of urea.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

Q.23 Classify various mass transfer operations and give their definitions.
