

- Q.25 Write any five differences between thermal and catalytic reforming.
- Q.26 Discuss about solutizer sweetening process.
- Q.27 Discuss about electrical desalting of crude oil with a neat diagram.
- Q.28 Describe fractional distillation of crude oil with its products in detail.
- Q.29 Define viscosity and viscosity index.
- Q.30 Explain any two process of reforming with diagram.
- Q.31 Discuss about deasphalting.
- Q.32 Describe theories of origin of petroleum.
- Q.33 Write properties and uses of Gasoline.
- Q.34 Write about octane and cetane number.
- Q.35 Describe any one solvent extraction process with neat sketch.

SECTION-D

- Note:** Long answer type questions. Attempt any two questions out of three questions. (2x10=20)
- Q.36 What is cracking? Explain the process of fluidized bed catalytic cracking with flow sheet.
- Q.37 What is dewaxing? Explain urea dewaxing process with flow sheet.
- Q.38 What is polymerization? With a neat flow sheet, explain the process of cold sulphuric acid polymerization.

No. of Printed Pages : 4

Roll No.

5th Sem / Chem Subject:- Petroleum Refining

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 C_nH_{2n} is the general formula for-
- Naphthenes
 - Olefins
 - Both a & b
 - Neither a nor b
- Q.2 For gasoline, the flash point ($<50^\circ\text{C}$) is determined by the-
- Saybolt chromometer
 - Abel apparatus
 - Pensky- Marten's apparatus
 - None of these
- Q.3 Which of the following is not used as a lubricant?
- Asphalt
 - Grease
 - Lubricating oil
 - Petroleum jelly
- Q.4 The main aim of cracking is to produce-
- Coke
 - Gasoline
 - Lube oil
 - None of these
- Q.5 Reforming-
- Uses naphtha as feedstock
 - Does not much affect the molecular weight of the feed
 - Improves the quality and yield of gasoline
 - All a, b and c.

- Q.6 Sweetening of petroleum product means the removal of-
- a) Wax
 - b) Organic impurities
 - c) Sulphur and its compounds
 - d) Water
- Q.7 Which of the following is desirable in petrol (Gasoline) but undesirable in kerosene?
- a) Paraffins b) mercaptans
 - c) Aromatics d) Naphthenic Acid
- Q.8 Which of the following is non-regenerative fixed bed catalytic reforming process?
- a) Thermofer catalytic reforming
 - b) Platforming
 - c) Hydroforming
 - d) Hyperforming
- Q.9 Octane number of n-heptane is assumed to be-
- a) 100 b) 0
 - c) 70 d) infinite
- Q.10 Crude oil is transported inland from oil field to refining mainly by the-
- a) Rail tankers
 - b) Underground pipe lines
 - c) Road tankers
 - d) None of these

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Write the chemical composition of hydrogen in petroleum.
- Q.12 Write two products of fractional distillation of crude oil.
- Q.13 Define cloud point.
- Q.14 Name any catalytic cracking process used in petroleum industry.
- Q.15 Write the name of types of polymerization process.
- Q.16 Write the name of solvent used in dewaxing of petroleum products.
- Q.17 Define Crude oil.
- Q.18 Name any one location of IOCL refining in India with capacity.
- Q.19 What is Viscbreaking?
- Q.20 Name the compound which is added to petrol to increase its octane number.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Explain composition and classification of crude oil.
- Q.22 Write a short note on origin of petroleum.
- Q.23 Write the difference between smoke point and aniline point.
- Q.24 Write about thermal cracking process.
