

- Q.6 Which type of petroleum product is used for heating and cooking purposes?
- Gasoline
 - Diesel
 - LPG (Liquefied Petroleum Gas)
 - Jet fuel
- Q.7 Excessive use of fertilizers can lead to:
- Increased plant growth and yield
 - Soil erosion
 - Nutrient-rich soil
 - Reduced water retention
- Q.8 Which of the following materials is responsible for binding the aggregates in concrete when mixed with water and allowed to set?
- Cement
 - Sand
 - Gravel
 - Gypsum
- Q.9 Fertilizers high in which nutrient promote strong root development and flower formation?
- Nitrogen
 - Phosphorus
 - Potassium
 - Magnesium
- Q.10 Which byproduct of sugar production is often used as a feedstock in the production of ethanol?
- Molasses
 - Bagasse
 - Syrup
 - Sucrose

SECTION-B

Note: Objective type questions. All questions are compulsory.
(10x1=10)

- Q.11 Name two common macronutrients used in agriculture.
- Q.12 What is begass?
- Q.13 Write molecular weight of Ammonia.

- Q.14 Define Dehydration?
- Q.15 What is cetane number?
- Q.16 Write formula of specific gravity.
- Q.17 Name any two Fertilizer used in agriculture.
- Q.18 Define Petroleum
- Q.19 What is Settling process?
- Q.20 Write one use of petrol?

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Write about NPK fertilizers, explaining what N,P, and K represent and their roles in plant nutrition.
- Q.22 Write about the Properties of crude oil.
- Q.23 Compare and contrast thermal and catalytic reforming processes in petroleum refining. What are the primary objectives of each process?
- Q.24 Describe the pretreatment processes involved in crude oil refining, including dehydration and desalting. Why are these steps necessary.
- Q.25 Discuss the drying process of sugar crystals and how it results in the final sugar product ready for packaging and distribution.
- Q.26 Discuss about Cracking with its types.
- Q.27 Explain the significance of the sugar industry in agricultural economies and the key products it generates.
- Q.28 Difference between Pour point and cloud point, flash point and fire point.
- Q.29 Explain the origin of crude oil and its composition. How is crude oil classified based on its properties, and why is this classification important in the refining process?
