

- Q.25 Explain the various factors which result into poor workmanship. (CO2)
- Q.26 What is the scope of investigation of defects in buildings. (CO3)
- Q.27 Write a short note on investigation and diagnosis. (CO3)
- Q.28 Describe the parts of basic kit is used in investigation of building defects. (CO3)
- Q.29 Enlist the various sources of dampness in a building? (CO3)
- Q.30 State the factors effect durability of concrete. (CO5)
- Q.31 Enlist different types of repair material. (CO5)
- Q.32 Write any five ideal characteristics for a Rebar primer. (CO5)
- Q.33 What is basic principle of water proofing? (CO6)
- Q.34 Describe the remedial measures for efflorescence removal? (CO6)
- Q.35 Explain the common methods of crack repair in building. (CO6)

#### SECTION-D

- Note:** Long answer type questions. Attempt any two questions out of three questions. (2x10=20)
- Q.36 Enlist the important factors that influence the decision to carry out repair and maintenance work of a structure. (CO1)
- Q.37 Describe various factors that affect the selection of material for repair work. (CO5)
- Q.38 Discuss different methods of water proofing for flat roofs. (Co6)
- (**Note:** Course outcome/CO is for office use only)

### 5th Sem / Civil, Brick Tech., Constr. Mgmt. Subject:- Repair and Maintenance of Buildings

Time : 3Hrs.

M.M. : 100

#### SECTION-A

- Note:** Multiple choice questions. All questions are compulsory (10x1=10)
- Q.1 Majority of the maintenance problems fall in the category of (CO1)
- Remedial maintenance
  - Special maintenance
  - Preventive maintenance
  - Routine maintenance
- Q.2 Maintenance activities undertaken at predetermined interval to attend the defects is known as (CO1)
- Emergency maintenance
  - Special maintenance
  - Remedial maintenance
  - Routine maintenance
- Q.3 Rate of deterioration depends upon \_\_\_\_\_ Capability of materials. (CO2)
- Blistering
  - Resisting
  - Blooming
  - Efflorescence
- Q.4 White deposit of salts on the surface of the brick indicates? (CO2)
- Mortar
  - Spalling
  - Efflorescence
  - Biological

- Q.5 Breaking of the concrete pieces from the reinforcement is called (CO3)  
 a) Spalling                      b) NDT  
 c) Leaching                      d) Cracking
- Q.6 Equipments which is used for assessing cover to reinforcement, diameter of bars and locations of bar is known as (CO3)  
 a) Ultrasonic  
 b) Windsor probe  
 c) Cover meter  
 d) Visual inspection probes.
- Q.7 Main causes of dampness is due to (CO4)  
 a) Shoring                      b) Spalling  
 c) Clogging                      d) Absence of DPC
- Q.8 Anti corrosion coating are also called (CO5)  
 a) Curing                      b) Rebar primer  
 c) Both a and b                      d) None of these
- Q.9 Which of the following are different types of repair material? (CO5)  
 a) Anti-corrosion coating  
 b) Adhesive aids  
 c) Repair mortars  
 d) All of the above
- Q.10 Which of the following are used as a sealant in repairing work? (CO6)  
 a) Bitumen sealants                      b) Polysulphide sealants  
 c) Sealing strips                      d) All of the above

## SECTION-B

**Note:** Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 The maintenance operation done before the defects occurred or damage developed in structure is called \_\_\_\_\_. (CO1)
- Q.12 Plastics creep under \_\_\_\_\_. (CO2)
- Q.13 Acidic ground water can cause \_\_\_\_\_ concrete. (CO2)
- Q.14 Relative strength of concrete is determined by \_\_\_\_\_. (CO3)
- Q.15 Dampness causes \_\_\_\_\_ on different surfaces of buildings. (CO4)
- Q.16 Excessive deflection and lateral bulging are the defects mainly found in \_\_\_\_\_? (CO4)
- Q.17 INP stands for \_\_\_\_\_? (CO5)
- Q.18 The process of keeping the finished concrete surface moist to enable it to gain strength is called \_\_\_\_\_? (CO5)
- Q.19 DPC stands for \_\_\_\_\_? (CO6)
- Q.20 Contraction of floor result in \_\_\_\_\_? (CO6)

## SECTION-C

**Note:** Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 What are the requirements of a good maintenance operation? (CO1)
- Q.22 What factors govern the serviceable life of a building? (CO1)
- Q.23 How faulty design and construction lead to deterioration of buildings. (CO2)
- Q.24 Enlist any five factors that affect the durability of concrete? (CO2)
