

- Q.26 Differentiate between Analog and Digital Signals.
 Q.27 Discuss the phase modulation in details?
 Q.28 Differentiate between LAN and WAN.
 Q.29 Discuss the function of comparator in DM?
 Q.30 Write a note on asynchronous serial transmission?
 Q.31 Explain transmission media?
 Q.32 Write a note on radio waves?
 Q.33 Write short note on infrared waves?
 Q.34 What do you mean by multi bit error?
 Q.35 Differentiate between Bus & star Topology?

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Explain Digital to Analog Conversion- ASK, PSK.
 Q.37 What do you mean by Multiplexing. Explain any one type of Multiplexing in Details?
 Q.38 What are different error correction method. Explain any one in details.

3rd Sem / Comp, IT Subject:- Data Communication

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 What is the acronym for LAN
 a) Local Area Network
 b) Local Access Network
 c) Line & Networking
 d) Line less networking
- Q.2 The variation in the time it takes for data packets to travel over a network is called.
 a) Jitter b) Noise
 c) Latency d) None of the above
- Q.3 Physical arrangement of devices on the network is called
 a) Protocols b) Topology
 c) Trailer d) LAN
- Q.4 Which of the following is the fastest media of data transfer.
 a) Fiber optics b) Co-axial cable
 c) Telephone lines d) Untwisted wire

(1) 180835/170835/120835
/030835

- Q.5 Which multiplexing techniques transmit digital signals?
- WDM
 - FDM
 - TDM
 - None of the above
- Q.6 Which of the following is not a digital-to-analog conversion?
- ASK
 - PSK
 - FSK
 - AM
- Q.7 Multiplexing provides _____
- Efficiency
 - Privacy
 - Anti jamming
 - Both Efficiency & Privacy
- Q.8 The number of bits of data that are processed in a given amount of time is called.
- Bit length
 - Data rate
 - Data length
 - Bit rate
- Q.9 A _____ medium provides a physical conduit from one device to another.
- Guided
 - unguided
 - Either (a) or (b)
 - None of the above
- Q.10 Maximum amount of data that can be transferred over a network in a given time is
- Band width
 - Attenuation
 - Total data
 - None of the above

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Bit length is also called _____.
- Q.12 What is Guided media?
- Q.13 Define Digital Data?
- Q.14 Define the term Amplitude?
- Q.15 Parallel transmission is faster then serial communication (T/F)
- Q.16 What does ASK represents?
- Q.17 DM stands for _____.
- Q.18 At which end multiplexing takes place?
- Q.19 What is TDM?
- Q.20 CRC stands for _____.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 What are the ways in which data is communicated in a network?
- Q.22 What is the function of the router in network?
- Q.23 What do you mean by square signals?
- Q.24 Discuss the latency in detail?
- Q.25 Elaborate Transmission Impairment.
