

- Q.23 Explain DBMS Architecture
- Q.24 Explain E-R Model
- Q.25 Explain Non-Trivial dependencies
- Q.26 Define index. How it is created
- Q.27 What is the use of Join. Explain its types.
- Q.28 Difference between file System & Database system
- Q.29 Explain cardinality Ratio
- Q.30 Explain Parallel DBMS
- Q.31 Explain the use of Alter & Drop command with example.
- Q.32 Explain various relationships among the entities.
- Q.33 Explain Data Independence
- Q.34 Explain Hierarchical Model
- Q.35 Define Normalization. Explain BCNF

#### SECTION-D

**Note:** Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Explain various components of SQL
- Q.37 Classify DBMS Users
- Q.38 Write a short note on

- i) Big data                      ii) Database Security.

#### 4th Sem / Comp, IT, CNC, CAD/CAM Subject:- Database Management System / RDBMS

Time : 3Hrs.

M.M. : 100

#### SECTION-A

**Note:** Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Which of the following is not a type of database?
- a) Hierarchical                      b) Network
- c) Distributed                      d) Decentralized
- Q.2 Which of the following is type of DML command
- a) Create                      b) Alter
- c) Delete                      d) All of the above
- Q.3 What is rows of a relation known as:
- a) Degree                      b) Entity
- c) Tuple                      d) Relation
- Q.4 Grant & Revoke are
- a) DCL                      b) DDL
- c) DML                      d) TCL

(1) 180843/170843/120843  
/030843

Q.5 Which level of data abstraction describes exactly how data is actually stored?

- a) Conceptual Level      b) Physical Level
- c) Logical Level          d) File Level

Q.6 DBA refers to

- a) Database Administrator
- b) Data Bank admin
- c) Database access
- d) Data access

Q.7 A file is basically a collection of all related

- a) Fields                      b) Database
- c) Records                    d) Entities

Q.8 Which one of the following commands is used to modify a column inside a table?

- a) Alter                        b) Drop
- c) Update                      d) Commit

Q.9 Primark Key can be

- a) Null                         b) Not Null
- c) Both Null & Not Null      d) Depends on Situation

Q.10 SQL is a

- a) Procedural                b) Non Procedural
- c) Both A & B                d) None of the above

### SECTION-B

**Note:** Objective type questions. All questions are compulsory. (10x1=10)

Q.11 Define data

Q.12 Expand DML

Q.13 Who is a System designer

Q.14 Define Schema

Q.15 Define Foreign Key

Q.16 Define Super key

Q.17 What is key attribute

Q.18 What is the use of Commit Command

Q.19 Expand DBMS

Q.20 What is the purpose of Revoke command

### SECTION-C

**Note:** Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

Q.21 Write the characteristics of a database system

Q.22 What are the responsibilities of a DBA
