

- Q.29 Identify the instruction format used in following instructions: (CO3)
MOV A, B; LDA 2500H ; DAA; MVI A, 25H; SUB M.
- Q.30 Explain any three Addressing Modes with example used in assembly language of 8085. (CO2)
- Q.31 Write a program in assembly language to find the sum of two numbers stored at 2100H & 2101H. Store the result at 2200H. (CO3)
- Q.32 Differentiate Memory Mapped I/O and I/O Mapped I/O interfacing schemes of Input-Output interfacing. (CO4)
- Q.33 Briefly explain DMA data transfer in 8085 with suitable diagram. (CO5)
- Q.34 Name various operating Modes of intel 8253. Also write two applications of it. (CO4)
- Q.35 Explain the interrupt instruction RIM in detail. (CO2)

SECTION-D

- Note:** Long answer type questions. Attempt any two questions out of three questions. (2x10=20)
- Q.36 Explain the instruction classification of 8085 with sufficient example instructions of each. (CO2)
- Q.37 Draw the Pin Diagram of 8085 and explain the function of each pin. (CO1)
- Q.38 a) Draw a control word format of 8255 and explain. (CO5)
b) List five Differences between 8085 and 8086 microprocessors. (CO6)
- (Note:** Course outcome/CO is for office use only)

No. of Printed Pages : 4 180844/170844/120844
Roll No. /031045/030834

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Expand SIM? (CO3)
a) Set interrupt Mask b) Sorting interrupt mask
c) Select interrupt mask d) None of the above
- Q.2 The program counter in 8085 micro-processor is a _____ bits register (CO1)
a) 20 b) 8
c) 16 d) 12
- Q.3 8086 microprocessor can access (CO6)
a) 512 MB Physical Memory
b) 1 GB Physical Memory
c) 1 MB Physical Memory
d) 64 KB Physical memory
- Q.4 The cycle required to fetch and execute an instruction in 8085 microprocessor is known as (CO3)
a) Clock cycle b) Memory cycle
c) Machine cycle d) Instruction cycle
- Q.5 RST0 - RST7 are the _____ in 8085. (CO2)
a) hardware interrupt b) Logical interrupt
c) software interrupt d) conditional interrupt
- Q.6 _____ used to implement the hardware interrupt (RST 7.5, RST 6.5, RST 5.5) by setting various bits to form masks or generate output data via the Serial Output Data (SOD) line.

- a) SIM Instruction b) RIM Instruction
c) EI d) DI
- Q.7 In 8085 microprocessor which one of the following statements is wrong. (CO5)
a) serial I/O is possible through SIM and RIM instruction
b) serial I/O is not possible in 8085
c) there is a pin available for serial output
d) there is a pin available for serial input
- Q.8 PPI stands for (CO4)
a) Programmable Peripheral Interrupt
b) Programmable Peripheral Interface
c) Programmable Parallel Interface
d) Parallel Programming Interface
- Q.9 The busses are available for the DMA controller when it receives the signal (CO5)
a) HLDA b) DACK
c) HRQ d) All of the mentioned
- Q.10 The no. of Machine Cycles required to execute the Instruction MOV A,M are=? (CO4)
a) 3 b) 2
c) 4 d) 5

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Identify the addressing mode of LHLD 2500H instruction. (CO3)
- Q.12 Name two flags of 8085. (CO1)
- Q.13 Memory is enabled when status of IO/M# is _____. (CO1)
- Q.14 RST 5.5 has the least priority. (T/F) (CO1)
- Q.15 The clock speed of 8086 is=_____Hz. (CO1)
- Q.16 BSR mode is related with port _____ of 8255. (CO4)

- Q.17 8259 has_____ no of interrupt request (IRQ) lines. (T/F) (CO4)
- Q.18 Handshake mode is related with_____ mode of data transfer. (CO5)
- Q.19 Expand RIM. (CO3)
- Q.20 Instruction Cycle=Fetch Cycle+ _____ cycle. (CO3)

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 What is microprocessor and explain its impact on modern society. (CO1)
- Q.22 Draw and explain the programming model of 8085. (CO1)
- Q.23 Explain in brief the Address/Data bus demultiplexing with suitable diagram and signals. (CO1)
- Q.24 Explain the generation of memory and I/O control signals with a logic diagram (CO1)
- Q.25 Briefly explain the purpose of Program Counter (PC) and Stack Pointer (SP) in 8085. (CO3)
- Q.26 Define functions of each of the following pins: (Co1)
TRAP, RD#, WR#, READY, SID
- Q.27 Define Machine Cycle and T-State. Also write no and name of the various machine cycles used to execute the instruction LDA 2250H. (CO3)
- Q.28 Write the steps of interrupt execution with a simple flowchart. (CO5)
