

Q.29 Write the advantages of power factor improvement.
(CO4)

Q.30 Compare energy efficient motor with standard motors
(CO4)

Q.31 Explain load factor
(CO5)

Q.32 Explain constructional Features of EEMS
(CO4)

Q.33 Write down steps required to reduce High commercial loss
(CO5)

Q.34 List types of product available for the star rating.
(CO2)

Q.35 Explain laws of illumination
(CO1)

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

Q.36 Explain ECBC guidelines on service hot water and pumping
(CO7)

Q.37 List out necessary aspects while designing the energy efficient motors
(CO5)

Q.38 Explain energy saving opportunities in HVAC system
(CO4)

6th Sem / Elect.

Subject:- Electrical Energy Conservation and Management

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

Q.1 The unit of Illuminance is (CO1)

- a) Lux
- b) luminaries
- c) lumens
- d) none of these

Q.2 One lux is equal to (CO1)

- a) One lumen per FT²
- b) Noe Lumen per meter cube
- c) One lumen per meters Q.
- d) None of these

Q.3 Full form of ECM (CO3)

- a) Energy Conservation Measures
- b) Energy Consumption Measures
- c) Energy Constant Measures
- d) None of these

Q.4 Transformer Capacity is Rated in (CO4)

- a) KW
- b) KVA
- c) Watt
- d) Joules

- Q.5 Power factor is (CO5)
 a) KW/KVA b) KVar/VA
 c) KVA/KW d) None of these
- Q.6 Distribution transformer has max efficiency (CO4)
 a) Around full load b) Nearly Half Load
 c) 50% Load d) None of above
- Q.7 One TON of Refrigeration is Equal to (CO7)
 a) 3.51 KW b) 3KW
 c) 2.50 KW d) None of these
- Q.8 In Energy efficient Transformer, Core is made up of (CO4)
 a) Silicon Steel b) Amorphous Material
 c) Cast Iron d) Copper
- Q.9 More is the Star Rating, More Efficient is the Electrical Appliance (CO7)
 a) False b) True
- Q.10 Which of following is a type of tariff (CO5)
 a) Simple Tariff b) Two part Tariff
 c) Block Rate Tariff d) All of above

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Write one tip of improve energy efficiency in your existing building. (CO1)
- Q.12 Define Bee star rating. (CO2)

(2)

180961/170961

- Q.13 What is the full form of ECMS (CO3)
- Q.14 BIS stands for _____ (CO4)
- Q.15 Define diversity factor (CO5)
- Q.16 1 Kilo watt hour (KWH) = Mega Joules (MJ) (CO6)
- Q.17 What is Full form of ECBC (CO7)
- Q.18 What do you mean by amorphous Transformer (CO4)
- Q.19 What is the need of energy efficient devices (CO5)
- Q.20 One ton of refrigeration = _____ (CO6)

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Describe led and its use. (CO1)
- Q.22 What is the importance of star rating. (CO2)
- Q.23 Write short note on Synergy meter. (CO3)
- Q.24 Explain in brief life cycle cost analysis. (CO4)
- Q.25 Define demand factor (CO5)
- Q.26 Write tips for energy saving in electric motors (CO6)
- Q.27 State ECBC guidelines in star labeling. (CO7)
- Q.28 Write general energy saving tips in Fans/Blowers (CO6)

(3)

180961/170961
