

- Q.25 What is current differential relay? (CO3)
 Q.26 Explain principle of working of Distance Relay? (CO3)
 Q.27 What is the principle of working of induction type relays? (CO3)
 Q.28 Enlist desirable properties of fuse material. Give some examples of materials used. (CO3)
 Q.29 Explain plate and pipe earthing. (CO3)
 Q.30 Explain phenomenon of arc production in circuit breakers. How can it be extinguished? (CO2)
 Q.31 What is earth leakage circuit breakers? (CO2)
 Q.32 Give advantages and disadvantages of Air blast circuit breakers. (CO2)
 Q.33 What is oil circuit breaker? Write few lines on minimum oil circuit breaker. (CO2)
 Q.34 Write a short note on faults in electrical fields. (CO1)
 Q.35 Explain two part tariff with its merits and demerits. (CO6)

SECTION-D

- Note:** Long answer type questions. Attempt any two questions out of three questions. (2x10=20)
 Q.36 Explain various types of faults in overhead systems and underground cables. (CO1)
 Q.37 What are the objectives of tariff? Explain various principal factors considered during framing of tariff. (CO6)
 Q.38 Explain working of buckholz relay used for protection of transformer in detail with diagram (Co4)

No. of Printed Pages : 4 180963/170963/120963
 Roll No. /030963

6th Sem / Elect Subject:- Electrical Power II / Power - II

Time : 3Hrs. M.M. : 100

SECTION-A

- Note:** Multiple choice questions. All questions are compulsory (10x1=10)
 Q.1 The following short circuit gives rise to symmetrical faults (CO1)
 a) phase to phase
 b) Phase to ground
 c) All the three phase short circuit
 d) None of the above
 Q.2 Which of the following circuit breaker has high reliability and minimum maintenance? (CO2)
 a) Oil circuit breaker
 b) Air-blast circuit breaker
 c) Sf6 circuit breaker
 d) Vacuum circuit breaker
 Q.3 At the commercial and residential buildings, now-a-days-_____ is preferred over rewirable fuses (CO2)
 a) Circuit breaker b) Iron clad switch
 c) MCB d) Neutral link
 Q.4 The material used for fuse element is (CO3)
 a) Silver b) Copper
 c) Tin-lead alloy d) all of these

(1) 180963/170963/120963
/030963

Q.5 Fuse are used where relays and circuit breakers (CO3)

- a) fail to interrupt heavy short circuit currents
- b) are not available
- c) take more time to clear fault
- d) are not economically justified

Q.6 To protect the alternator against earth leakage. (CO4)

- a) no protection is required
- b) some mechanical protection is employed
- c) earth leakage protection scheme is employed
- d) none of the above

Q.7 A lightening arrestor is a device which (CO5)

- a) isolates the circuit at overload condition
- b) isolates the circuit at overvoltages
- c) provides an easy conducting path for flow of current at over voltages
- d) provides high resistance path for flow of current at over-voltages.

Q.8 The lightening arrestor acts as (CO5)

- a) surge reflector b) surge coil
- c) surge diverter d) surge absorber

Q.9 The demand factor of a power system is defined as (CO6)

- a) ratio of average load to maximum load
- b) ratio of maximum load to connected load
- c) ratio of maximum load to average load
- d) ratio of connected load to maximum load

Q.10 For a pure resistive load, power factor is (CO6)

- a) unity b) zero lagging
- c) zero leading d) negative

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

Q.11 When a short circuit occurs, Voltage at the fault point becomes zero(T/F) (CO1)

Q.12 What is switch gear? (CO2)

Q.13 What is full form of HRC fuse? (CO2)

Q.14 A fuse element should have_____ melting point. (CO2)

Q.15 Arching ground can be prevented by_____ (CO3)

Q.16 Rewirable fuses do not deteriorate with passage of time. (T/F) (CO3)

Q.17 What are possible faults in generators? (CO4)

Q.18 Describe arching grounds. (CO5)

Q.19 What is the effect of over voltage on an electrical equipment? (CO5)

Q.20 Define tariff. (CO6)

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

Q.21 Explain a scheme for protection of bus bar. (CO4)

Q.22 Explain Merz Price circuit for protection against insulation failure in generators. (CO4)

Q.23 What is an indirect lightening stroke? (CO5)

Q.24 Discuss about Horn gap arrester. (CO5)
