

- Q.28 Explain the structure of estimating organization. (CO4)
- Q.29 Name the various lathe operations. Explain any one. (CO4)
- Q.30 Write the procedure to calculate material cost. (CO4)
- Q.31 Discuss the difference between down time and tear down time. (CO5)
- Q.32 Differentiate between idealness cost and repairs and maintenance cost. (CO5)
- Q.33 Write the factors which are considered to estimate the time for a milling operation. (CO5)
- Q.34 Discuss various foundry losses. (CO6)
- Q.35 Explain the factors upon which cutting speed depends. (CO6)

SECTION-D

- Note:** Long answer type questions. Attempt any two questions out of three questions. (2x10=20)
- Q.36 Define Budget & explain its different types. (CO3)
- Q.37 Calculate the time required for drilling 8 holes in a flange. The diameter of each hole is 1.5 cm & the depth is 1cm. Taking cutting speed as 30m/m/n & feed as 0.2 mm/rev.
- Q.38 Define forging & explain the procedure of estimation of Forging cost.

6th Sem / Mech Engg, Printing Tech. Subject:- Estimating and costing

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Which one of the following helps in calculating the actual cost of manufactured product (CO1)
- a) Budget b) Estimation
c) Depreciation d) Costing
- Q.2 Material, Labour and Expenses are the three important_____ of cost. (CO2)
- a) Methods b) Process
c) Techniques d) Elements
- Q.3 In which method of depreciation interest is charged on the cost of machine every year? (CO2)
- a) Insurance policy method
b) Straight line method
c) Sinking fund method
d) Annuity charging method
- Q.4 Cost control represents (CO2)
- a) efforts made towards achieving target or goal
b) the achievement in reduction of cost
c) existence of concealed potential savings in standard or norms
d) a corrective function

(1) 181765/171765/105362
/106162

- Q.5 Which of the following is an example of functional classification of cost? (CO2)
 a) Direct labour cost b) Direct material cost
 c) Factory overhead d) Indirect material cost
- Q.6 Quality of an estimator is (CO1)
 a) He should have knowledge of machining processes.
 b) knowledge of accounts
 c) Knowledge of quantity of materials
 d) all of the above
- Q.7 Factory cost is the sum of Prime cost and ____ (CO3)
 a) Sales expense
 b) Distribution expenses
 c) Factory expenses
 d) None of these
- Q.8 An example of variable overhead is _____ (CO3)
 a) Telephone bills b) Insurance expenses
 c) Expenses on tools d) Postal expenses
- Q.9 Total cost = manufacturing cost + distribution expenses + _____ (CO4)
 a) Sales expenses
 b) Capital expenditure
 c) Administrative expenses
 d) Factory expenses
- Q.10 The Overall financial status of an organization is given by (CO4)
 a) Cost accounting b) Order book value
 c) Budget d) Financial accounting

(2) 181765/171765/105362

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Define cost estimation. (CO1)
 Q.12 Describe cost accounting. (CO2)
 Q.13 Define depreciation. (CO1)
 Q.14 Define capital investment. (CO3)
 Q.15 Define factory expenses. (CO3)
 Q.16 Define interest on capital. (CO3)
 Q.17 Define unit costing. (CO3)
 Q.18 Describe estimator. (CO1)
 Q.19 Write use of flywheel. (CO4)
 Q.20 What is grinding? (CO5)

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Explain comparison of estimating and costing. (CO1)
 Q.22 List down the principal element of cost. (CO1)
 Q.23 What do you mean by overhead and discuss its types? (CO2)
 Q.24 What are different method of calculating depreciation? Explain any one of them. (CO3)
 Q.25 What is fixed cost and variable cost? (CO3)
 Q.26 Discuss costing concept and how it is different from estimation. (CO3)
 Q.27 What is cost estimation? What are its functions? (CO3)
