

- Q.27 Write down the properties and dyeing procedure with disperse/Reactive dyes?
- Q.28 Write down in detail the working of continuous dyeing machine.
- Q.29 Discuss the dyeing mechanism of 1:1 & 1:2 metal complex dyes.
- Q.30 Write down the thermosol process of dyeing Polyester.
- Q.31 Write a note on Banned dyes and Chemicals.
- Q.32 Write down the method of determining Washing Fastness of a dyed sample.
- Q.33 Explain the working of loose stock dyeing machine.
- Q.34 Write a note on Eco friendly Dyes and Chemicals.
- Q.35 Discuss the faults and remedies in Beam dyeing Machine.

SECTION-D

- Note:** Long answer type questions. Attempt any two questions out of three questions. (2x10=20)
- Q.36 Explain the principle & working of Beam dyeing machine with a neat diagram?
- Q.37 Explain the working and operation of Winch dyeing machine.
- Q.38 Explain different dyeing methods of polyester also explain advantages and disadvantages of the methods?

No. of Printed Pages : 4

5th Sem / Text. Design Subject:- Dyeing Technology - II

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Fadometer is used to determine _____ fastness of dyes material.
- a) Perspiration b) Washing
c) Rubbing d) Light
- Q.2 Cobalt metal is used in the chemical structure of _____ dye?
- a) Disperse b) Direct Dye
c) Metal complex d) None of these
- Q.3 _____ is a water insoluble dye?
- a) Acid Dyes b) Azoic dyes
c) Remazol d) Direct dye
- Q.4 _____ dyes combination is used to dye P/C blend material
- a) Acid, Reactive b) Reactive, sulfur
c) Remazol Dye d) Disperse, Reactive

(40)

(1) 182553/122553/032541
/2554/2542

- Q.5 _____ machine is used in fabric dyeing?
- a) Hank Dyeing b) Package dyeing
c) Beam dyeing d) None of these
- Q.6 _____ is used to measure perspiration Fastness of material?
- a) Perspirometer b) Laundrometer
c) Crockmeter d) None of these
- Q.7 Which of the following is/are batch dyeing
- a) Beam dyeing b) winch
c) jigger d) All of these
- Q.8 Give one example of natural Dye?
- a) Reactive Dye b) turmeric
c) Remazol Dye d) None of these
- Q.9 Give example of an exhausting agent?
- a) Hydrogen peroxide b) Sod. Hydroxide
c) Common salt d) None of these
- Q.10 Polyester material is mostly dyed with _____?
- a) Reactive b) Disperse Dyes
c) Basic Dyes d) None of these

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 _____ is used during dyeing of Polyester Material. (Dispersing/retarding Agent)
- Q.12 What is diffusion.

(2) 182553/122553/032541
/2554/2542

- Q.13 _____ temperature is maintained during High temperature method of polyester?
- Q.14 Define pH?
- Q.15 _____ pH is maintained during dyeing with Basic Dyes?
- Q.16 Permetallised dyes are also called as _____
- Q.17 Define auxochrome.
- Q.18 Write down the temperature and pH of High temperature dyeing method of polyester.
- Q.19 Sample port & collar are found in _____ machine. (Hank/Beam dyeing)
- Q.20 Disperse /reactive dye combination is used to dye _____ blend.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Classify coloring matters with the help of a chart.
- Q.22 Write a note on Chrome dyes.
- Q.23 Write down the importance pretreatments and after treatments in dyeing.
- Q.24 Write down the method of dyeing with Basic dyes.
- Q.25 What are the essential qualities of a carriers used in carrier dyeing its disadvantages.
- Q.26 Mention 5 defects and remedies of Dyeing blends?
