

- Q.31 Write the advantages and disadvantages of sley eccentricity.
- Q.32 Draw the five wheel take up motion.
- Q.33 Write short note on different types of temple.
- Q.34 Discuss different types of sheds with diagrams.
- Q.35 Differentiate between loose reed and fast reed warp protector motion.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Draw the passage of material through the loom with clear sketch and briefly explain its parts.
- Q.37 Define shed? Discuss all type of sheds along with advantages and disadvantages.
- Q.38 Draw the flow chart of different types of shedding. Explain in detail about open shedding with suitable diagram.

No. of Printed Pages : 4

Roll No.

3rd Sem / Textile Desgn, Text Tech.

Sub :Weaving Technology-I

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Interlacement of warp and weft is called.
 a) Shedding b) Weaving
 c) Knitting d) Let off
- Q.2 Machine used for weaving is called as
 a) Tappet b) Dobby
 c) Jacquard d) Loom
- Q.3 Which device is used for raising and lowering of warp in loom?
 a) Temple b) Heald
 c) Cloth beam d) Shuttle
- Q.4 It is responsible for pushing the last pick of weft to the fell of the cloth by means of the beat up motion.
 a) Lease rod b) Picker
 c) Reed d) Treadle
- Q.5 Which is not a shedding device
 a) Tappet b) Dobby
 c) Jacquard d) Picking

- Q.6 Which motion inserts weft in the fabric
 a) Shedding b) Picking
 c) Beat up d) Wheel
- Q.7 Loom timing is adjusted w.r.t.
 a) Bottom shaft b) Crank shaft
 c) Auxiliary Shaft d) None of the above
- Q.8 When the shuttle comes out from the shed during picking is called
 a) Jerk b) Shuttle Fly out
 c) Shuttle trap d) None of the above
- Q.9 It is the roller device on a loom that hold the cloth at a proper width
 a) Temple b) Reed
 c) Treadle d) heald
- Q.10 Which motion improves the fabric quality of fabric
 a) Primary b) Secondary
 c) Auxillary d) All of the above

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Weaving is _____.
 Q.12 Define Warp.
 Q.13 Define take up?
 Q.14 Give example of shuttle less looms.

(2) 182733/122733/032733

- Q.15 Shedding is dividing of _____ sheets in two layers.
 Q.16 Loom speed is expressed in term of _____.
 Q.17 Explain Fell of cloth.
 Q.18 A shuttle normally weighs about _____ kgs.
 Q.19 Write the function of back rest?
 Q.20 What is negative shedding mechanism.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Explain the primary and secondary motion of looms.
 Q.22 Explain shedding timing and elaborate early and late shedding.
 Q.23 Write the materials used for picking stick, shuttle and sley.
 Q.24 Give the features of a power loom.
 Q.25 Differentiate between five wheel and seven wheel take up motion.
 Q.26 Draw the over pick motion and label the parts.
 Q.27 Calculate the production/hr of a loom. Loom rpm = 192 P.P.I. is 60 and loom efficiency is 80%.
 Q.28 Briefly explain the different parts of handloom.
 Q.29 Define weft fork motion. Explain briefly any one weft fork motion.
 Q.30 Draw and explain continuous take up motion.

(3) 182733/122733/032733
