Roll No.

Level 3, 2nd Sem / Food Processing

Subject : Crop Production Technology

Time : 2 Hrs.

M.M. : 50

SECTION-A

Note: Very short answer Questions. Attempt all ten questions. (10x1=10)

- Q.1 What is the primary factor used to classify crops as Kharif or Rabi?
- Q.2 What is ideal range of air temperature for most crop plants to perform photosynthesis efficiently?
- Q.3 Give an example of a crop that is classified as a cash crop.
- Q.4 What is the main objective of primary tillage?
- Q.5 What is called to the water present in the soil that is available to plants?
- Q.6 Which cropping system involves growing two or more crops simultaneously in the same field?

- Q.7 Name a short-duration variety of Arhar (Pigeon pea).
- Q.8 The optimum time for sowing mustard (Brassica Juncea) is during which season?
- Q.9 Which physiological disorder in cauliflower is caused by boron deficiency?
- Q.10 What is the phenomenon where a crop's growth is stunted or negatively affected due to prolonged exposure to low temperatures?

SECTION-B

Note: Short answer type questions. Attempt any six questions out of Eight questions. (6x5=30)

- Q.11 List and briefly describe two common classifications of crops based on their season of growth. Give one example for each.
- Q.12 How does the effect of temperature influence both the vegetative and reproductive stages of crop growth?
- Q.13 What is a "Seedbed"? Why is a well-prepared seedbed essential for achieving a high seed germination percentage?

(2)

189222

- Q.14 Describe the three types of soil water based on availability to plants. Which type is most readily available?
- Q.15 Discuss the key production aspects of a major cereal crop like wheat. Include variety, sowing time, and fertilizer requirements.
- Q.16 Outline the essential production practices for a major oilseed crop, such as mustard. Cover sowing time, spacing, and time of harvest.
- Q.17 Explain the main production technology for a major cash crop like sugarcane. Include key aspect of planting, spacing, and water requirement.
- Q.18 Detail the important production practices for a major vegetable crop like potato. Describe the process of 'earthing up' and its significance.

SECTION-C

Note: Long answer type questions. Attempt any one questions out of two questions. (1x10=10)

- Q.19 Tillage and Soil-water Management: Define primary and Secondary tillage, outlining the main objectives of each. Discuss how proper tillage practices can positively impact the soil-water-plant relationship and improve overall soil health.
