3rd Sem / Chemical (Pulp & Paper)

Subject : Stock Preparation - 1

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

- Q.1 Which of the following property measure that how rapidly water can drain from a diluted fiber?
- a) Freeness b) Consistency
c) Wettability d) Brightness
- Q.2 Which of the following represent the interface between the pulp mill and the paper making machine?
- a) Stew preparation b) Dew preparation
c) Stock preparation d) Stall preparation
- Q.3 Loading is related to _____
- a) Chemical b) Beating
c) Refining d) All of the above

Q.4 Expand OD

- a) Over dry b) Oven dry
- c) Over day d) None

Q.5 Refining is a _____ treatment.

- a) Mechanical b) Chemical
- c) Semi chemical d) None

Q.6 Which property of paper sample can be measured by cobb test?

- a) Length b) Breadth
- c) Absorption of liquid d) None

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

Q.7 Write the working principle of thickener.

Q.8 What is the function of mixing chest?

Q.9 Which chest is used in stock preparation?

Q.10 Is beating of pulp necessary?

Q.11 Define pulp

Q.12 Why CaCO_3 is used in stock preparation?

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

Q.13 Describe the importance of hemi-cellulose in beating and refining.

Q.14 What do you mean by stock proportioning system?

Q.15 Why CMC is used in paper industry?

Q.16 Describe schopper Reigler.

Q.17 Explain the working of valley beater with a neat sketch.

Q.18 How can we measure the water retention value of a beaten pulp sample.

Q.19 Give any five effect of PH in beating of pulp slurry.

Q.20 Mention any two main uses of potcher in detail.

Q.21 Draw a neat diagram of wide angle refiner.

Q.22 Write any five reason to use save-all.
