

### SECTION-D

**Note:** Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

- Q.23 Explain with neat diagram the working principle of multicylinder dryer section used for kraft paper manufacturing plant.
- Q.24 Write the need for the removal of condensate from the dryer shell. Also explain with neat sketch the working principle of stationary siphon.
- Q.25 Write short note on any two of the following:(4x2=8)
- a) Winders and Rewinders
  - b) Different operations in finishing section.
  - c) Rotary cutter.

No. of Printed Pages : 4

220654

Roll No. ....

**5th Sem. / Chemical (Pulp & Paper)**

**Subject : Paper Making-II**

Time : 3 Hrs.

M.M. : 60

### SECTION-A

**Note:** Multiple choice questions. All questions are compulsory (6x1=6)

- Q.1 Name the dryers used for calender paper
- a) M.F. Dryer                      b) M.G. Dryer
  - c) Drum dryer                      d) None of the above
- Q.2 Lead dryer is -
- a) First dryer                      b) Last dryer
  - c) Middle dryer                      d) Biggest dryer
- Q.3 Heat transfer occurs due to
- a) potential difference
  - b) temperature difference
  - c) concentration difference
  - d) None of the above

- Q.4 Sheet blackening is due to
- a) high crown                      b) low crown
  - c) Excessive moisture      d) All of the above

Q.5 The enclosure used around dryer section is -

- a) Ventillation system      b) reel
- c) Calender                      d) dryer hood

Q.6 Amount of water vapour in air is called as :

- a) relative humidity      b) saturation humidity
- c) Absolute Humidity      d) Pressure

### SECTION-B

**Note:** Objective/ Completion type questions. All questions are compulsory. (6x1=6)

- Q.7 What is the purpose of sweat dryer?
- Q.8 Define relative humidity.
- Q.9 Define dew point.
- Q.10 What is the function of rope carrier?
- Q.11 Define pulp consistency.
- Q.12 Write the name of the instrument/equipment used for removal of the condensate from the dryer section.

### SECTION-C

**Note:** Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

- Q.13 Write the advantages of closed hood system over open hood system.
- Q.14 What are the reasons of hard and soft spots? How can we minimise the same.
- Q.15 Explain in brief the working of Calendering section.
- Q.16 Explain with neat sketch the construction details of cylinder dryer.
- Q.17 What is drying? Explain in brief the need of drying.
- Q.18 Explain in brief the manufacturing process of hand made paper.
- Q.19 Explain with neat diagram the constant rate and falling rate drying.
- Q.20 Explain Embossing with neat diagram.
- Q.21 Explain in brief the manufacturing process of carbonless paper.
- Q.22 A paper machine is producing 200 tonne per day of paper with 5% moisture content. If the consistency in the head box is 1% and after couch roll is 20%. Calculate the amount of water removed at the wire part.
