

Q.21 Explain the preparation and uses of packed cells.

Q.22 Write short notes on Cryoprecipitate.

### SECTION-D

**Note:** Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

Q.23 Discuss in detail of ABO blood group systems including principles, procedures, and clinical significance.

Q.24 Describe the different anticoagulants used in blood banks, including their composition, advantages, and limitations.

Q.25 Discuss in detail about the blood cross matching and Coombs test for transfusion reactions.

No. of Printed Pages : 4

### 3rd Sem / DMLT, DMLT (For Speech and Hearing Impaired)

**Subject : Transfusion Medicine / Transfusion Medicine (Blood Banking)/ Blood Banking**

Time : 3 Hrs.

M.M. : 60

### SECTION-A

**Note:** Multiple choice questions. All questions are compulsory (6x1=6)

Q.1 The discovery of Rh factor was made by:

- a) Landsteiner Wiener
- b) Coombs and mourant
- c) Lee and White
- d) Karl and Paul Ehrlich

Q.2 Antigen-antibody reaction is also known as:

- a) Agglutination
- b) Hemolysis
- c) Coagulation
- d) Sedimentation

Q.3 The universal recipient blood group is:

- a) O negative
- b) AB positive
- c) B positive
- d) A negative

(4160)

(1) 221935/181935/121935  
/031945

- Q.4 The ideal temperature for storing whole blood is:
- a) 0°C                                      b) 1-6°C
  - c) -20°C                                      d) Room temperature

Q.5 EDTA is used as an anticoagulant mainly in:

- a) blood bank storage
- b) Hematology investigation
- c) Cross matching only
- d) Coombs testing

Q.6 Indirect Coombs test is used to detect:

- a) Free antibodies in serum
- b) Bound antibodies on RBCs
- c) Platelet antibodies
- d) Hemoglobin antibodies

### SECTION-B

**Note:** Objective/ Completion type questions. All questions are compulsory. (6x1=6)

Q.7 Define transfusion medicine.

Q.8 Mention one difference between antigen and antibody.

Q.9 Write the principle of Rh blood grouping.

Q.10 Name any two types of anticoagulants used in blood banks.

Q.11 Write one criterion for selection of a blood donor.

Q.12 What is cross matching in blood transfusion?

### SECTION-C

**Note:** Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

Q.13 Explain about various transfusion reactions in blood banking.

Q.14 Define antigens and antibodies and mention their classification.

Q.15 Explain the antigens and antibodies involved in the ABO blood group system.

Q.16 Write the principle and steps of Rh blood grouping.

Q.17 Discuss the composition and role of CPDA Anticoagulant.

Q.18 Explain the advantages and disadvantages of commonly used anticoagulants.

Q.19 Write short notes on the criteria and characteristics of an ideal blood donor.

Q.20 Describe collection and storage of blood under proper conditions.
