

- Q.24 Elaborate Structure of Safety Committee.
- Q.25 How can organizations foster a positive safety climate and encourage proactive safety behaviors among employees?
- Q.26 Discuss the difference between constructive and destructive conflicts in organizational settings.
- Q.27 Identify common barriers to effective communication in the workplace.
- Q.28 Describe the role of trade unions in advocating for improved health and safety standards in the workplace.
- Q.29 Discuss the benefits of implementing a safety suggestion scheme in promoting continuous improvement.
- Q.30 Explain how safety manuals can be tailored to meet the specific needs and risks of different industries.
- Q.31 What challenges do trade unions face in advocating for health and safety improvements in the modern workplace?
- Q.32 Provide examples of incentives or rewards commonly offered for valuable safety suggestions.
- Q.33 Describe the psychological factors that contribute to risk perception and safety behaviors.
- Q.34 Role and Responsibilities of Safety Officer.
- Q.35 What strategies can organizations use to make safety promotional messages more impactful and memorable?

SECTION-D

- Note:** Long answer type questions. Attempt any two questions out of three questions. (2x10=20)
- Q.36 Discuss the various sources of information on safety, health and accidents within industrial settings, the compilation and processing of this information, the analysis and use of modern methods of managing safety data, and the importance of storing and retrieving Management Information System (MIS) for Safety, Health, and Environment (SHE)
- Q.37 What are the various accident costs? Break them up into direct and indirect costs. Explain briefly steps taken to control them.
- Q.38 Outline the objectives of emergency planning, highlighting the goals related to prevention, preparedness, response, and recovery

1st Year / Industrial Safety Subject:- Safety Management

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory. (10x1=10)

- Q.1 What is the importance of storing and retrieving Management Information System (MIS) for Safety, Health and Environment (SHE) in Industries?
- Facilitates real-time monitoring
 - Enables performance evaluation
 - Supports decision-making processes
 - All of the above
- Q.2 Which modern methods are commonly used for the analysis of safety-related information in industries?
- Data analytics
 - Machine learning
 - Predictive modeling
 - All of the above
- Q.3 The "Barrier Model" of accident prevention emphasizes:
- The importance of individual behaviors in accident causation
 - The role of organizational culture in shaping safety outcomes
 - The need for multiple layers of defense to prevent accidents
 - The inevitability of accidents regardless of preventive measures
- Q.4 Safety signs provide:
- Information about hazard areas
 - Caution information
 - Warnings
 - All of the above

- Q.5 What are major accident hazards in industrial settings?
- Minor incidents with no significant impact
 - Events with limited consequences
 - Serious incidents that can cause severe harm or damage
 - Routine operational occurrences
- Q.6 What are potential consequences of major industrial hazards?
- Minor inconvenience to workers
 - Temporary disruption of operations
 - Severe injuries, fatalities, and environmental damage
 - Limited impact on surrounding communities
- Q.7 Who is the secretary of safety committee:
- Production officer
 - Occupier
 - Safety Officer
 - Factory Inspector
- Q.8 Which of the following is an example of a direct financial cost of an accident?
- Decreased employee morale
 - Loss of production due to downtime
 - Medical expenses for injured workers
 - Damage to company reputation.
- Q.9 Which theory of motivation suggests that individuals are motivated by a hierarchy of needs, with basic physiological needs at the bottom and self-actualization needs at the top?
- Expectancy Theory
 - Theory X and Theory Y
 - Maslow's Hierarchy of Needs
 - Herzberg's Two-Factor Theory
- Q.10 As per Model Rules under Factory Act 1948, the safety committee shall meet at least :
- Once in every quarter
 - Once in every 6 months
 - Once in year
 - Once in four months

SECTION-B

- Note:** Objective type questions. All questions are compulsory. (10x1=10)
- Q.11 Management's role in motivating employees to prioritize safety includes providing adequate resources for safety initiatives and prioritizing productivity over safety concerns.
- True
 - False

(2)

RLI-095401

- Q.12 _____ proposes that individuals are motivated to act in a certain way if they believe that their efforts will lead to desired outcomes and if they perceive those outcomes as valuable.
- Q.13 Applying motivational theories to safety initiatives can enhance employee engagement and safety performance within organizations.
- True
 - False
- Q.14 Formula for Severity rate of accident
- Q.15 Probability of the event that might occur x Severity of the event if it occurs = _____
- Q.16 The PDCA (Plan-Do-Check-Act) cycle is a continuous improvement methodology used in various industries to manage processes, drive efficiency, and achieve better results.
- True
 - False
- Q.17 Full form of SWOT in terms of Strategic Planning/ Management.
- Q.18 As per the Model rules under the Factories Act 1948, Form no. _____ (Prescribed under Rule 121 (3)) is required to report of dangerous occurrence which does not result in death or bodily injury.
- Q.19 _____ is a leadership style where leaders have absolute control and authority to make decisions and supervise their subordinates with minimum or no input from others.
- Q.20 The safety department can enhance safety motivation among employees by conducting regular safety inspections and audits, but ignoring safety concerns raised by employees.
- True
 - False

SECTION-C

- Note:** Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)
- Q.21 Define autocratic leadership and explain its key characteristics.
- Q.22 Define direct and indirect financial costs of accidents and provide examples of each.
- Q.23 How can proactive risk management strategies help mitigate the financial and social costs associated with accidents?
