

- Q.27 Describe the factors affecting the storage the fruits and vegetables. (CO4)
- Q.28 Enlist different traditional storage structures and give brief description any one of them. (Co4)
- Q.29 Write a short note on operation of LSU Dryer. (CO3)
- Q.30 Describe the Cool-chain for handling and storage of fruits and vegetables. (CO5)
- Q.31 Differentiate between Deep and Shallow bins. (CO4)
- Q.32 Explain the working principle of Bucker Elevator with a neat diagram. (CO1)
- Q.33 Write different storage conditions for fruits and vegetable. (CO4)
- Q.34 What is the concept of controlled and modified atmosphere storage? (CO4)
- Q.35 How will you differentiate between thermal conductivity and thermal diffusivity. (CO2)

SECTION-D

Time : 3 Hrs.

SECTION-A

- Q.1 Milling of food grain include (CO1)
a) Grading b) Cleaning
c) Separating c) All of these
- Q.2 Mixing and non-mixing dryer are the type of (CO3)
a) Bath dryer b) Continuous flow dryer
c) Flat bed dryer d) Deep bed dryer
- Q.3 Khapra larvae insect comes under the category of (CO4)
a) Parasites b) Minor insect
c) Major insect d) Incidental
- Q.4 Which of the following is the indirect loss of fruit crops. (CO5)
a) Physical loss
b) Chemical Loss
c) Biological loss
d) Inadequate marketing system
- Q.5 Cold storage, preservation and distribution system in known as (CO5)
a) Freezing b) Cool chain
c) Chilling d) Storing

- Q.6 Moisture content can be represented by (CO3)
 a) Dry basis b) Wet basis
 c) Both A & B d) Moisture
- Q.7 LSU dryer was developed specially for drying_____. (CO3)
 a) Rice b) Wheat
 c) Gram d) Barley
- Q.8 Bag storage has _____ operating cost as compared to bulk storage system. (CO4)
 a) Lower b) Higher
 c) Optimum d) None of these
- Q.9 The solid particle of grains are cut or broken into smaller pieces in. (CO1)
 a) Shorting b) Expelling
 c) Size reduction d) Drying
- Q.10 Specific gravity is a _____ property of agriculture material. (CO2)
 a) Mechanical b) Thermal
 c) Physical d) Frictional

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (10x1=10)

- Q.11 Density is the physical properties of agricultural material. (True/False) (CO2)
- Q.12 Define Terminal Velocity. (CO2)

- Q.13 The process of excess moisture removal is called_____. (CO3)
- Q.14 _____ provide the adequate protection of food grain from rodents, birds, insects etc.
- Q.15 During harvesting faulty tools _____ the quantity of fresh produce. (CO5)
- Q.16 Define packaging. (CO5)
- Q.17 Name any two pulse crop. (CO3)
- Q.18 Define blending. (CO1)
- Q.19 Define Thermal Conductivity of agricultural material. (CO2)
- Q.20 State storage of grain. (CO4)

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Describe the need and importance of Post-harvest Technology. (CO1)
- Q.22 Differentiate between the Bag and Bulk storage of cereals and pulses. (CO4)
- Q.23 Explain different physical properties of agricultural materials. (CO2)
- Q.24 Discuss about the temperature and moisture changes during the storage of cereals. (CO4)
- Q.25 Describe the Brown-Duvel fractional distillation method of moisture content determination. (CO3)
- Q.26 Write the different losses during storage of grains and how will you control them? (CO4)
