

- Q.27 Discuss about objectives & benefits of land leveling.
- Q.28 List down different in-situ and ex-situ straw management machinery.
- Q.29 What is the procedure for selection of farm machinery?
- Q.30 What should be safety precautions taken for using threshers?
- Q.31 Explain the working of granular fertilizer spreaders.
- Q.32 Explain the term threshing efficiency and cleaning efficiency.
- Q.33 Explain the working principle of paddy thresher.
- Q.34 Describe the constructional details of knapsack sprayer.
- Q.35 What do you understand by preventive maintenance and storage of thresher?

#### SECTION-D

- Note:** Long answer type questions. Attempt any two questions out of three questions. (2x10=20)
- Q.36 Explain the construction and working principle of a potato digger elevator. How does it differ from a groundnut digger shaker?
- Q.37 Describe the constructional details and working principle of a combine harvester.
- Q.38 Explain the complete procedure of cost estimation of using farm machinery.

#### SECTION-A

**Note:** Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Which part of power sprayer is used to break the liquid into desired spray and deliver to plants?
- a) Pressure gauge      b) Nozzle
- c) Boom                      d) Strainer
- Q.2 Pods, heads or ears and free seeds, lost during the cutting and conveying operations are called as:
- a) Cylinder loss
- b) Walker loss (rack loss)
- c) Shoe losses
- d) Gathering losses
- Q.3 The items of fixed cost are:
- a) Depreciation and labour
- b) Taxes and fuels
- c) Insurance and repair
- d) Interest and housing

- Q.4 Operating pressure of the hand operated sprayer is \_\_\_\_\_.
- a) 1-7 kg/cm<sup>2</sup>                      b) 10-20 kg/cm<sup>2</sup>  
 c) 20-55 kg/cm<sup>2</sup>                      d) >55 kg/cm<sup>2</sup>
- Q.5 Speed of the cutter bar in case of combine (grain) is \_\_\_\_\_.
- a) 400-550 rpm                      b) 500-800 rpm  
 c) 800-1000 rpm                      d) 1000-1200 rpm
- Q.6 An Olpad thresher is operated:
- a) Manually                      b) By a pair of Bullocks  
 c) By a tractor                      d) By an electric motor
- Q.7 ASPEE are famous for manufacturing:
- a) Tractor                      b) Power tillers  
 c) Ploughs                      d) Sprayers
- Q.8 The process of detaching grains from the plants:
- a) Harvesting                      b) Reaping  
 c) Threshing                      d) Digging
- Q.9 It is an implement for inter cultivation with laterally adjustable tines.
- a) Furrow opener                      b) Cultivator  
 c) Harrow                      d) Plough
- Q.10 The purpose of registration in a mower is:
- a) To get uniform length of cut of grass  
 b) To run the mower at minimum power  
 c) To run the mower at uniform torque  
 d) To reduce the occurrence of overload

## SECTION-B

**Note:** Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Write types of cultivators.
- Q.12 Give names of different types of dusters.
- Q.13 Write different adjustments of mower.
- Q.14 What is the function of a duster?
- Q.15 What is the function of puddler?
- Q.16 Write methods of harvesting.
- Q.17 What is the use of Hay rakes?
- Q.18 What is testing farm machinery?
- Q.19 Write types of nozzle used in sprayers.
- Q.20 Write two precautions for safe use of insecticides.

## SECTION-C

**Note:** Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 What do you understand by inter-culture tools? Also write down names of inter-culture tools.
- Q.22 Explain different types of nozzles used in sprayer.
- Q.23 Discuss about functions and components of hydraulic spraying system.
- Q.24 Enlist various machines used for harvesting different crops.
- Q.25 Write a short note on alignment & registration of mower.
- Q.26 Describe the use and function of pruning shears, tree pruners, and loppers.
