

- Q.23 Explain the principle of Thermit welding?
- Q.24 Discuss the safety precautions while welding?
- Q.25 Explain any five applications of die casting.
- Q.26 Write any five importance properties of moulding sand.
- Q.27 Discuss different types of patterns?
- Q.28 Explain different types of risers?
- Q.29 Describe any five press operations.
- Q.30 Explain the process of wire drawing.
- Q.31 Explain in brief open die forging.
- Q.32 Explain three high mill-rolling with the help of a sketch.
- Q.33 What are the five differences between hot forging and cold forging?
- Q.34 Write five advantages of forging.
- Q.35 What are limitations of using plastics?

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Explain the principles, working, advantages, disadvantages and application of TIG welding.
- Q.37 Explain the process of pipe drawing and tube drawing with diagram?
- Q.38 Elaborate rolling defects and its remedies in detail.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Welding is used for making
- a) Permanent joint b) Temporary joint
- c) Both (a) and (b) d) None of the above
- Q.2 In Thermit welding, temperature produced by Thermit reaction is nearly
- a) 1500 Degree Celsius
- b) 2500 Degree Celsius
- c) 3000 Degree Celsius
- d) 5000 Degree Celsius
- Q.3 Which is not a welding defect?
- a) Slag inclusion b) Flux
- c) Hot tears d) Distortion

(1) 180333/171733/121733
/031733

- Q.4 The function of risers is
- To support core
 - To store molten metal
 - To make mould cavity
 - All of above
- Q.5 In centrifugal casting, core is made of
- Sand
 - Ferrous metal
 - Non-ferrous metal
 - None of the above
- Q.6 Contraction while solidification is compensated by
- Gates
 - Runners
 - Ladle
 - Risers
- Q.7 Which of the following is a forming operation?
- Bending
 - Drawing
 - Squeezing
 - All of the above
- Q.8 Loose piece patterns are held with
- Dowels
 - Cores
 - Binders
 - Nails
- Q.9 Sand blasting is used for
- Cleaning the casting
 - Finishing the casting
 - Core making
 - Mixing sand and additives

- Q.10 Which furnace is used to convert pig iron in to grey cast iron?
- Blast furnace
 - Cupola furnace
 - Crucible furnace
 - Induction furnace

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Name any two gases used in welding.
- Q.12 Define weldability.
- Q.13 Draw sketch of leftward gas welding.
- Q.14 What are the elements of a gating system?
- Q.15 Wax is used for _____ casting process.
- Q.16 Write the use of parting sand.
- Q.17 Extrusion dies are made of _____
- Q.18 Name any two types of rolling?
- Q.19 Name a material used for making die used in press operations.
- Q.20 Write the limitations of use of plastic.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Write any five advantages of welding.
- Q.22 What are the applications of laser beam welding?
