

- Q.29 Draw a neat diagram of single stage centricleaner.
- Q.30 Explain objective of washing.
- Q.31 Explain the construction and working detail of vibratory screen.
- Q.32 Mention any five factors drying start up & shut down of MSW.
- Q.33 Explain the complete procedure for determination of KMNO₄.
- Q.34 List any five important variables affecting efficiency of BSW.
- Q.35 Define thickening factor.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Discuss the construction & working detail of rotary drum vacuum filter.
- Q.37 Explain with neat sketch the working of high heat diffusion washing in continuous digester.
- Q.38 Write a short note on any two of the following:
- a) Soda loss b) Kappa no.

No. of Printed Pages : 4

3rd Sem / Chem . P&P Subject:- Pulp Washing and Cleaning

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 On which factor BSW efficiency depends
- a) Types of wood b) Screening
- c) Pulping type d) None
- Q.2 What is the purpose of washing?
- a) To mix pulp with B/L
- b) To separate the pulp from B/L
- c) Both a & b
- d) None
- Q.3 What is the purpose of centricleaners?
- a) To remove air from pulp
- b) To remove dirt from pulp
- c) To remove shives from pulp
- d) All of the above
- Q.4 Where white Liqour is used in paper Industry
- a) Digester b) Thickener
- c) Both A & B d) None of these

- Q.5 Screening of pulp is based on _____
- Size
 - Density
 - Shape
 - None
- Q.6 Which factors affects the cleaning of pulp?
- Color of pulp
 - Density of pulp
 - Smell of pulp
 - Resin of pulp
- Q.7 Rotary drum filter is _____
- Batch process
 - Continuous process
 - Both a & b
 - None
- Q.8 Write the name of NaOH
- Caustic soda
 - Sodium carbonate
 - Sodium Sulphate
 - None
- Q.9 What is the mechanism of screening?
- Separation by density
 - Separation by size
 - Separation by weight
 - None
- Q.10 Write the name of Na_2SO_4 .
- Sodium sulphate
 - Sodium bicarbonate
 - Sodium sulphite
 - None

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Give a purpose of solid concentration of black liquor.

- Q.12 Write optimum temperature for washing of pulp
- Q.13 Write parameters in selection of a screen of pulp.
- Q.14 What is done with rejects of vibratory screen wash plants?
- Q.15 On which principle BSW is carried out?
- Q.16 Define yield.
- Q.17 Write any one factor affecting BSW performance.
- Q.18 What happen in delignification?
- Q.19 Name any two types of pulp screen.
- Q.20 What is specks?

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Define production rates and loading factors.
- Q.22 What is the effect of consistency on cleaning in centricleaning system?
- Q.23 Draw a neat & clean sketch of three stage counter current BSW.
- Q.24 Why washing of pulp is necessary?
- Q.25 Define white liquor.
- Q.26 Mention the effects of washer speed upon mat thickness.
- Q.27 Define kappa no.
- Q.28 What is the effect of wood species on screen capacity.
