

- Q.32 Describe any two properties and uses of the following:
 a) Aluminium b) Stainless steel
- Q.33 Differentiate between thermosetting plastic and thermoplastics. (any five)
- Q.34 Write a short note on
 a) Epoxies b) Polymers
- Q.35 What are fine resisting materials? Explain.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Discuss in brief the geological classification of rocks.
- Q.37 Comparison between Hoffman's kilns & Bulls trench kiln in detail.
- Q.38 Write short notes on the following:
 a) Rapid hardening cement
 b) Low heat cement
 c) High alumina cement
 d) Portland Pozzolana cement
 e) Quick setting cement

No. of Printed Pages : 4
 Roll No.

180734/170734/
120734/030734

3rd Semester/ Civil, GE, Brick Tech, Const Mgmt, Highway Engg. Subject: Construction Materials

Time : 3 Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Granite is an example of:
 a) Aqueous rocks b) Sedimentary rocks
 c) Metamorphic rocks d) Igneous rocks
- Q.2 The most powerful explosive used in blasting is :
 a) Blasting powder b) Dynamite
 c) Gun cotton d) All of above
- Q.3 Excess of alumina in the clay :
 a) Makes the brick brittle and weak
 b) Makes the brick crack and warp on drying
 c) changes colour of the brick from red to yellow
 d) Improves impermeability and durability of the brick
- Q.4 For one cubic meter of brick masonry, the number of bricks required are
 a) 400 b) 450
 c) 500 d) 550

180734/170734/
120734/030734

- Q.5 The ultimate strength of cement is provided by
 a) Silica b) Di-calcium silicate
 c) Tri-Calcium silicate b) Tri-calcium aluminate
- Q.6 Le-Chatelier method is used to determine
 a) Initial setting time of cement
 b) Fineness of cement
 c) Soundness of cement
 d) Normal consistency of cement
- Q.7 The central part of a tree is called
 a) Heart wood b) Pith
 c) Sap wood d) Cambium layer
- Q.8 The thinner used for oil paint is
 a) Water b) Turpentine
 c) Carbon tetrachloride d) Any one of these
- Q.9 Brass is an alloy of
 a) Copper and Tin b) Zinc and Lead
 c) Copper and Zinc d) Zinc and Nickel
- Q.10 Which of the following is the main ingredient of cement?
 a) Lime b) Gypsum
 c) Clay d) Sand

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (10x1=10)

- Q.11 Rocks formed by changes in heat and pressure are known as ____.
- Q.12 Presence of iron oxide affects _____ of brick.
- Q.13 The initial setting time of ordinary Portland cement (OPC) should not be less than _____.

(2)

180734/170734/
120734/030734

- Q.14 The best wood to be used for superior quality of furniture is ____.
- Q.15 _____ are used to improve the properties of concrete.
- Q.16 The carbon content in wrought iron varies from _____.
- Q.17 Decay in timber is due to _____.
- Q.18 _____ is used for manufacturing of cement.
- Q.19 The standard sieve used for fineness test of cement ____.
- Q.20 Compressive strength of ordinary Portland cement should not be less than _____ kg/cm².

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 What are the qualities of a good building store? (Any five)
- Q.22 What are the precautions to be taken in the process of blasting?
- Q.23 Give classification of the brick earth.
- Q.24 Write a short note on drying of bricks.
- Q.25 What are the properties of ceramic tiles? (any five)
- Q.26 How would you assure in the field whether the cement being used is of or good or poor quality?
- Q.27 Write down the uses of cement? (any five)
- Q.28 Name the various methods used for preservation of timber.
- Q.29 Explain the purpose of seasoning of timber. (any five)
- Q.30 Give the characteristic of good paint. (any five)
- Q.31 Enumerate the different types of paint.
