

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Calculate the cost of material of 10 m³ cement concrete flooring, 5cm thick cement concrete 1:1.5 :3 over 10 cm thick cement concrete 1:4:8 over 10 cm sand filling. rate of cement @ 400/- per bag, rate of Sand @1000/- per cum and rate of aggregate @1500/- per cum.
- Q.37 Explain the following :
 a) Depreciation b) Sinking Fund
 c) Year's Purchase d) Salvage Value
- Q.38 Compute the quantity of earthwork, cement concrete, brickwork in cement mortar 1:5 in plinth and foundation and also in superstructure from the given plan and section of L shaped wall given in figure.

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 An Estimate is
 a) Cost of structure thumb rule
 b) Random guess of cost of construction
 c) Probable cost arrived before construction
 d) Actual cost of construction
- Q.2 Which of the following is not used to prepare approximate estimate?
 a) Cubical Content Estimate
 b) Plinth Area Estimate
 c) Revised Estimate
 d) Centre line method
- Q.3 The measurement is not made in square meter in case of
 a) Formwork b) Floors
 c) DPC d) R.C. Chajja
- Q.4 What is the weight of 1 cum of steel Reinforcement?
 a) 7.85 Kg b) 7850 Kg
 c) 785 kg d) 7.85 Quintel
- Q.5 In the analysis of rates, the profit of the contractor is generally taken as
 a) 10% b) 15%
 c) 20% d) 5%
- Q.6 Calculate the number of bricks in 20 m³ brickworks
 a) 500 b) 1000
 c) 10000 d) 100000

(1) 180763/120763/030763

- Q.7 The following document contains detailed description of all items of work excluding their quantities along with the current rates
 a) Analysis of rates b) Tender Document
 c) Abstract Estimate d) Schedule of Rates
- Q.8 The value of the property recorded in the register of the local authority
 a) Rateable Value b) Assessed Value
 c) Replacement Value d) Distress Value
- Q.9 The Contract in which the contractor agrees to execute work at fixed rate as per DSR plus premium
 a) Item rate Contract b) Lumpsum Contract
 c) Combination of both d) Special Contract
- Q.10 The value of property during its useful life based on purchase value and depreciations is known as
 a) Junk Value b) Salvage Value
 c) Scrap Value d) Book Value

SECTION-B

Note: Objective type questions. All questions are compulsory.
 (10x1=10)

- Q.11 _____ is defined as covered area of a building measured at floor level.
- Q.12 _____ means quantity of a particular item which a labour of a particular trade can do in a working day of 8 hours.
- Q.13 The unit of measurement of painting doors and windows (3 Coats) is _____.
- Q.14 Draw Table of Measurement.
- Q.15 One brick wall is roughly equal to _____.
- Q.16 The quantity of sand required for 10 m³ of cement concrete 1:3:6 is _____.
- Q.17 The provision of work charges establishment is generally _____.
- Q.18 The scrap value of property is both positive or negative. (True/False)

- Q.19 The offer given by a contractor of firm in writing to execute a specified work is called _____.
- Q.20 The rates quoted by the contractor in response to the tender call to carry out the work or supply of material are called _____.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 What is estimate and write the purpose of estimation as well.
- Q.22 What are the data required for the preparation of detailed estimate.
- Q.23 Write down units of measurement of the following:
 a) Painting b) Reinforced Cement concrete
 c) DPC
 d) Random Rubble Masonry in cement Mortar 1:6
- Q.24 Explain the long and short wall method with the help of a diagram.
- Q.25 Calculate the weight of steel reinforcement required in 10 m³ RCC if percentage of steel reinforcement is 1.25% per cum.
- Q.26 Explain the rules of management.
- Q.27 Calculate the quantities of material required for Brickwork in cement mortar (1:7) for 100 m³.
- Q.28 Calculate the cost of construction of a college building using the plinth area method when the plinth area of the building is 1350 m² and plinth area rate is Rs. 2250 per m².
- Q.29 Explain the steps involved in the analysis of rates.
- Q.30 Differentiate between Plinth and carpet area.
- Q.31 Define earnest and retention money.
- Q.32 What are the different types of contract. Explain any one.
- Q.33 What are the principles of valuation.
- Q.34 Prepare tender document for whitewashing.
- Q.35 Define Lead and Lift.
