

- Q.27 Explain arithmetic & relational operators in C with example.
- Q.28 Explain preprocessor directives in C.
- Q.29 Name any three header files in C along with the associated functions.
- Q.30 Explain difference between if and nested if loops in C.
- Q.31 Explain difference between compiler & interpreter.
- Q.32 Explain the function of linker in C.
- Q.33 Explain PDLC in detail.
- Q.34 Explain any one exit-controlled loop in C.
- Q.35 Explain the structure of a C program.

## SECTION-D

Time : 3Hrs.

## SECTION-A

- Note:** Long answer type questions. Attempt any two questions out of three questions. (2x10=20)
- Q.36 Name all 32 keywords in C & briefly explain function of each keyword.
- Q.37 Explain Relational & Bitwise operators operators in C.
- Q.38 Explain actual & dummy arguments in C with proper examples.

- Q.6 Bitwise  $\wedge$  operator stand for  
 a) NOT                              b) AND  
 c) EX-OR                            d) OR
- Q.7 What is the size of float variable in C  
 a) 1 byte                              b) 2 bytes  
 c) 3 bytes                            d) 4 bytes
- Q.8 'volatile' in C is a  
 a) variable                            b) constant  
 c) reserved word                   d) none of these
- Q.9 Which function is used to convert uppercase text to lowercase text in C  
 a) strcpy                              b) strlwr  
 c) strlen                              d) none of these
- Q.10 Which escape sequence is used to transfer control to next line  
 a) \b                                    b) \a  
 c) \n                                    d) none of these

### SECTION-B

**Note:** Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 What is the difference between = and ==?
- Q.12 `int *x;`  
 What is stored in x?
- Q.13 Solve :  
`0101 1110 >> 2`

(2) 181034/171034/121034

- Q.14 Explain difference between `int main` and `void main`.
- Q.15 What is `clrscr()`? Also, mention header file in which it is stored.
- Q.16 "%If" is format specifier for which data type?
- Q.17 Name the formatted and unformatted I/O functions in C.
- Q.18 Explain the difference between algorithm and flowchart.
- Q.19 Explain the difference between `void main()` and `int main()`
- Q.20 Find out output of following C code:  
`0==1?1:0;`

### SECTION-C

**Note:** Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 What is function prototype in C? Explain where is it declared.
- Q.22 Explain subscript in C language.
- Q.23 Explain actual & dummy arguments in C with examples.
- Q.24 Explain how to  
 a) compile                              b) run  
 c) execute a C program
- Q.25 Explain debugging and compilation in a C program.
- Q.26 Explain characteristics of a good program.

(3) 181034/171034/121034
