

- Q.24 Discuss the trickling filtration of wastewater treatment.
- Q.25 Define recycling of food waste. Give its types.
- Q.26 Why by-product utilization is so important?
- Q.27 Give the importance of food waste management on economy base.
- Q.28 Discuss the main characteristics of food waste.
- Q.29 Write a short note on the nutrients of wastewater.
- Q.30 Discuss the process of biogas generation.
- Q.31 Give the importance of food waste management.
- Q.32 Define source reduction in food waste management.
- Q.33 What do you understand by the pretreatment of waste?
- Q.34 Write a brief note on by-product utilization.
- Q.35 Define the terms segregation and flotation in food waste management.

SECTION-D

- Note:** Long answer type questions. Attempt any two questions out of three questions. (2x10=20)
- Q.36 Describe in detail the different methods of tertiary wastewater treatment of food industries.
- Q.37 Write short note on Rotating Biological Contractors and activated sludge process in of wastewater treatment.
- Q.38 Write a detailed note on environmental protection act and specification for effluent of different food industries.

No. of Printed Pages : 4

Roll No.

6th Sem / Food Technology

Subject:- Waste Management in Food Industry

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Which of the following methods uses earthworms during composting?
- Vermicomposting
 - Vertical Composting
 - Windrow composting
 - Burning
- Q.2 The biochemical oxygen demand is computed by
- Dissolved oxygen / Dilution factor
 - Dissolved oxygen + Dilution factor
 - Dissolved oxygen – Dilution factor
 - Dissolved oxygen * Dilution factor
- Q.3 Which of the following is not used for removing the permanent hardness?
- Lime soda process
 - Zeolite process
 - Demineralization
 - Adding lime
- Q.4 The total hardness of water is 100ppm as CaCO₃ equivalent. What is the type of water?
- Soft
 - Moderately hard
 - Hard
 - Very hard

- Q.5 One degree of hardness is equivalent to _____ ppm.
 a) 2 b) 1
 c) 10 d) 100
- Q.6 The clustered particles formed in the presence of a flocculant are called _____
 a) Flocs b) Colloid
 c) Ion d) Polymer
- Q.7 Activated sludge process degrade organics and _____
 a) Improve nutrients b) Remove nutrients
 c) Remove odour d) Remove taste
- Q.8 The term ISWM refers to :
 a) Integrated Solid Waste Management
 b) Integrated Solid Waste Machine
 c) International Solid Waste Mechanis
 d) International Solid Waste Management
- Q.9 Turbidity in water is caused by which of these following?
 a) Total dissolved solids b) Suspended solids
 c) Ions d) Heavy metals
- Q.10 _____ is the amount of oxygen required to oxidize only organic matter in sewage.
 a) Turbidity b) BOD
 c) COD d) DO Iron/Iodine

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Give full form of COD.
- Q.12 Activated carbon filters primarily remove taste and odors in water treatment systems. (True/False)
- Q.13 Give full form of TOD.
- Q.14 The state of _____ had the largest number of biogas plants in India. (Maharashtra/Rajasthan)
- Q.15 Rotating biological contactor consists of a series of rotating discs. (True/False)
- Q.16 Name of any two secondary treatment process for effluent treatment.
- Q.17 Give full form of RRR.
- Q.18 A lagoon is a shallow body of water protected from a larger body of water by sandbars, barrier islands, or coral reefs. (True/False)
- Q.19 _____ is "a process of contact and adhesion whereby the particles of a dispersion form larger-size cluster". (Sedimentation/Flocculation).
- Q.20 Chemical used in coagulation is _____

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 What do understand by the BOD of wastewater?
- Q.22 Write a short note on oxidation ponds of wastewater treatment.
- Q.23 Draw a neat and clean diagram for upward flow sand filtration and label it properly.
