

- Q.26 Discuss role of various ingredients in any thermosets application
- Q.27 Discuss UV-stabilizers.
- Q.28 Discuss various types of lubricants used plastic compounding.
- Q.29 Explain intensive dry mixer.
- Q.30 Discuss anti block and anti-slip agents with example.
- Q.31 Discuss flame retardant additives with example.
- Q.32 Discuss blowing agent additives and their types.
- Q.33 Write short note on Solvents and diluents.
- Q.34 Explain dye and pigments with suitable example
- Q.35 Explain principle of compounding?

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Explain construction and working of:
- a) Ribbon blender b) Mixer extruder
- Q.37 Discuss :
- a) Mould release agents
- b) Smoke suppressants
- Q.38 Discuss :
- a) Construction and working of two roll mill
- b) Banbury Mixer with neat sketch

No. of Printed Pages : 4

182255/122255/032255

Roll No.

5th Sem / Plastic

Subject:- Compounding and Formulation of Plastics/Compound of Poly.

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 DOP and DIOP are examples of ____.
- a) Fillers b) Plasticizers
- c) Stabilizers d) Lubricants
- Q.2 Which of the following is an example of a flame retardant?
- a) Benzo-phenones b) Polyvinyl chloride
- c) Titanium dioxide d) Antimony oxide
- Q.3 Which of the following is an example of a UV stabilizer?
- a) Phenols b) Secondary amines
- c) Phosphites d) All of these
- Q.4 Calcium carbonate is used as ____ in polymer compounding.
- a) as a filler b) as a colorant
- c) As a stabilizer d) All of them

- Q.5 Anti oxidants are used in polymer as _____.
- To extend chains of polymer
 - To protect plastics from oxidation
 - to improve surface finish
 - None of these
- Q.6 _____ is used in mastication of rubber.
- Ribbon blender
 - Disperser
 - Two roll mill
 - Banbury Mixer
- Q.7 Which among the following is a UV light absorber?
- Phosphate esters
 - Quaternary ammonium compounds
 - Glycol ester
 - Benzophenones
- Q.8 DOP stands for _____.
- Di-octyl phthalates
 - Di-octyl plastic
 - Di-octane phthalates
 - None of the above
- Q.9 _____ prevent moulded article from sticking to the mold surface.
- Catalyst
 - Fillers
 - Mold release agent
 - Anti-static agents
- Q.10 HALS stands for _____.
- Hindered Amine light stabilisers
 - Hindered Aluminium Stabilisers
 - Hindered Ammonia last stabilisers
 - None of these

(2) 182255/122255/032255

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 _____ equipment is used for mastication of rubber.
- Q.12 Name defoamers used in plastic industry.
- Q.13 Expand DIOP.
- Q.14 _____ is an example of blowing agent.
- Q.15 Name two antioxidants.
- Q.16 _____ is an example of solvent used in plastic compounding.
- Q.17 _____ is an example of filler.
- Q.18 Expand SMC.
- Q.19 Give an example of heat stabilizers.
- Q.20 State an application, where high speed mixer is used.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Discuss compounding of PVC for solid applications.
- Q.22 Define antioxidants with example.
- Q.23 How will you select particular filler for desired application?
- Q.24 Explain construction and working of high shear mixer.
- Q.25 Discuss colorant and its types.
