

- Q.27 What is Leno jacquard?
- Q.28 Explain the concept of pick-and-pick loom.
- Q.29 State two difference between Dobby and Jacquard shedding.
- Q.30 Define harness building and its role in jacquard.
- Q.31 Explain principle of jacquard shedding.
- Q.32 What is the function of harness ties in jacquard shedding?
- Q.33 Describe card cutting machine.
- Q.34 What is cross-border jacquard suitable for?
- Q.35 Write short note on inverted hook jacquard.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Describe classification and mechanism of multiplex box motion with diagrams.
- Q.37 Explain in detail the working of double lift double cylinder jacquard with diagram.
- Q.38 Compare climax dobbie and paper dobbie construction.

No. of Printed Pages : 4

182542/122542/032542

Roll No.

4th Sem. / Text. Design Subject : Fabric Manufacture-II

Time : 3 Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Chain making for 4x4 box motion is mainly done using
- Wooden lags
 - Perforated cards
 - Link chains
 - None
- Q.2 Which of the following jacquards is suitable for larger repeats?
- Single lift single cylinder
 - Double lift double cylinder
 - Leno jacquard
 - Inverted hook
- Q.3 Pick-at-will motion enables
- Flexible shuttle selection
 - Automatic warp tensioning
 - Backward weft insertion
 - None of the above

- Q.4 A dobby mechanism controls
- Weft tension
 - Shedding
 - Take-up motion
 - Beat-up motion
- Q.5 In harness building, what is the primary component?
- Heddles
 - Reed
 - Shuttle
 - None
- Q.6 Paper dobby uses which of the following for operation?
- Wooden rods
 - Metal chains
 - Perforated paper
 - None
- Q.7 The purpose of a card cutter is
- To design dobby patterns
 - To create punched cards for jacquards
 - To repair broken cards
 - None of the above
- Q.8 A jacquard shedding mechanism can control
- Up to 12 harnesses
 - Limited to simple patterns
 - Individual warp ends
 - None of the above
- Q.9 Which jacquard has hooks that operate in reverse?
- Leno
 - Inverted hook
 - Cross-border
 - None of the above
- Q.10 Dobby shedding is not suitable for
- stripes
 - Plaids
 - Intricate motifs
 - Small geometric Designs

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (10x1=10)

- Q.11 Which jacquard mechanism uses two cylinders and a double lift system.
- Q.12 What is a harness tie used for?
- Q.13 Write down the types of harness tie.
- Q.14 Define shedding.
- Q.15 What is the primary objective of using multiple box motion in a loom?
- Q.16 What is the function of the climax dobby?
- Q.17 Which shedding device uses a paper dobby?
- Q.18 What is the role of harness ties in jacquard weaving?
- Q.19 Which type of dobby shedding involves two lifting mechanisms?
- Q.20 Name the jacquard mechanism that uses inverted hooks.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 What are the objectives of multiple box motion.
- Q.22 Write short note on chain making for 4x4 box motion.
- Q.23 What is single lift and double lift dobby?
- Q.24 Describe construction of a paper dobby.
- Q.25 State uses of climax dobby.
- Q.26 How does single lift single cylinder jacquard operate?
