

### SECTION-D

**Note:** Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Explain washing fastness test. Write the detailed procedure to test washing fastness using laundrometer.
- Q.37 Explain and write the procedure and method to test barium activity number?
- Q.38 Illustrate in detail about the instrument and procedure to test light fastness on light fastness tester?

No. of Printed Pages : 4

182645/122645/032653

Roll No. ....

### 4th Semester/ Text. Proc., Text Chem. Subject : Textile Chemical Testing

Time : 3 Hrs.

M.M. : 100

### SECTION-A

**Note:** Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Textile fibre can be identified by?
- a) Burning Test                      b) Microscopic Test
- c) Solubility Test                      d) All of these
- Q.2 Cotton is soluble in?
- a) Acetone                                  b) Acetic Acid
- c) 75% H<sub>2</sub>SO<sub>4</sub>                                  d) None of these
- Q.3 Caustic Soda (NaOH) is used in.
- a) Scouring                                  b) Desizing
- c) Mercerizing                                  d) Singeing
- Q.4 Viscometer instrument is used in \_\_\_\_\_ test?
- a) Cuprammonium fluidity
- b) Copper number
- c) Barium activity number
- d) Solubility test
- Q.5 Wool produce \_\_\_\_\_ like smell on burning?
- a) Paper                                          b) Plastic
- c) Hair                                              d) None of these

- Q.6 Which instrument is used to test light fastness?  
 a) Crock Meter                      b) Exposure Rack  
 c) Laundrometer                    d) Tachometer
- Q.7 Axial ratio of mercerized cotton is?  
 a) 15                                      b) 1.5  
 c) 20.5                                  d) 50.5
- Q.8 How many types of greyscales are there?  
 a) 2                                        b) 4  
 c) 8                                        d) 16
- Q.9 Copper number test is related to?  
 a) Mercerization                    b) Degumming  
 c) Bleaching                         d) Dyeing
- Q.10 Methylene blue is a \_\_\_\_\_?  
 a) Enzyme                              b) Dye  
 c) Pigment                             d) Softener

### SECTION-B

**Note:** Objective/ Completion type questions. All questions are compulsory. (10x1=10)

- Q.11 Write full form of TDS.
- Q.12 Viscose rayon is soluble in \_\_\_\_\_.
- Q.13 Name the instrument used to check perspiration fastness.
- Q.14 Define Deconvolution count.
- Q.15 Define Axial ratio.
- Q.16 Name the instrument used to test sublimation fastness?
- Q.17 Exposure rack is used to check which fastness?
- Q.18 Name the instrument to test wet rubbing fastness?
- Q.19 Name the types of hardness of water.

- Q.20 Name a test for estimation of chemical degradation to wool?

### SECTION-C

**Note:** Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Write the procedure of determining blend percentage of polyester wool.
- Q.22 Write the importance of Textile Chemical testing.
- Q.23 Why soft water is necessary for wet processing?
- Q.24 Give a brief note on copper number test.
- Q.25 What are grey scales and where they are used?
- Q.26 Explain procedure to test wet rubbing fastness.
- Q.27 Why colour fastness tests are important?
- Q.28 Write the procedure of light fastness testing on exposure rack.
- Q.29 Explain briefly method to quantitatively estimate bleaching powder.
- Q.30 Write method to determine fat & wax content in textile material.
- Q.31 Write the method for estimation of Deconvolution count.
- Q.32 How to find available strength of  $H_2O_2$ ?
- Q.33 Write a note on cuprammonium fluidity test.
- Q.34 Explain in brief about five parameters of waste water.
- Q.35 What is hardness of water? Explain its types.
