

- Q.17 Explain the principle of osmotic dehydration and its use in fruit processing.
- Q.18 What are the key differences between fruit preserves, glazed, and crystallized fruits?

SECTION-D

Note: Long answer type questions. Attempt any one questions out of two questions. (1x10=10)

- Q.19 Explain in detail the various steps of post-harvest handling of fruits and vegetables, from harvesting to storage. What are the major causes of post-harvest losses, and how can they be minimized?
- Q.20 Discuss the industrial processing of tea and coffee, highlighting the key differences between the processing methods for different varieties. Explain the final steps of preparing instant versions of these beverages.

SECTION-A

Note: Multiple Choice questions. All questions are compulsory. (5x1=5)

- Q.1 What is the primary objective of blanching fruits and vegetables during post-harvest processing?
- a) To increase their moisture content
 - b) To enhance their natural color
 - c) To inactivate enzymes that cause discoloration and spoilage
 - d) To add preservatives
- Q.2 As per the Fruit Products Order (FPO) specifications what is the minimum total soluble solids (TSS) content required in jam?
- a) 55%
 - b) 60%
 - c) 65%
 - d) 68.5%
- Q.3 The technology of pickling vegetables often relies on which type of fermentation to create a sour flavor without added acid?

- a) Acetic acid fermentation
 - b) Ethanolic fermentation
 - c) Lactic acid fermentation
 - d) Malic acid fermentation
- Q.4 Which processing step is deliberately omitted during the production of green tea, unlike black tea?
- a) Rolling
 - b) Withering
 - c) Oxidation (fermentation)
 - d) Drying
- Q.5 When making jellies, a tough or stringy texture can be a defect caused by:
- a) Using too much sugar
 - b) Using too little sugar
 - c) Not enough acid
 - d) Overcooking the jelly

SECTION-B

Note: Objective type questions. All questions are compulsory. (5x1=5)

- Q.6 Concentration of fruit juices is primarily done to reduce the bulk and weight for transportation and storage.(True/False)
- Q.7 The substance responsible for the cloudiness or haze in fruit juice, which is often removed by enzymes, is_____.

(2)

189232

- Q.8 What is the key principle behind preserving pickles?
- Q.9 What is the main chemical preservative used in tomato ketchup?
- Q.10 The primary purpose of canning is to completely destroy all microorganisms, including spores, to achieve commercial sterility.(True/False)

SECTION-C

Note: Short answer type questions. Attempt any six questions out of Eight questions. (6x5=30)

- Q.11 Explain the significance of post-harvest treatment of fruits and vegetables.
- Q.12 What is the role of pectin, sugar, and acid in the manufacture of jellied fruit products like jam and jelly?
- Q.13 Differentiate between fruit juice clarification and fruit juice concentration.
- Q.14 What is blanching, and why is it a critical step in the processing of vegetables for freezing or canning?
- Q.15 What are the main steps in the processing of black tea? How does this differ from green tea processing?
- Q.16 What is aromatization in the context of instant coffee production, and why is it necessary.
