

- Q.25 Write advantages and applications of ultrasonic welding.
- Q.26 Explain the principle of operation of Arc welding with neat diagrams.
- Q.27 Explain any five properties of moulding sand.
- Q.28 Explain working of die casting.
- Q.29 Name the various types of Casting defects.
- Q.30 Write a short note on pit furnace.
- Q.31 Explain open die forging.
- Q.32 Write various properties of plastics? Also mention type of plastic?
- Q.33 Write various advantages of Rolling.
- Q.34 Explain any two press operation in details.
- Q.35 Explain Injection moulding machines.

SECTION-D

- Note:** Long answer type questions. Attempt any two questions out of three questions. (2x10=20)
- Q.36 Explain construction and working of Cupola furnace with neat diagram.
- Q.37 Explain any ten welding defects in details.
- Q.38 Explain principle and working of Compression moulding machines.

No. of Printed Pages : 4
Roll No.

MSIL-121733/031733

3rd Sem / Mech. Engg. (MSIL) Subject:- Workshop Technology - I

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Oxy hydrogen welding is a type of
- Gas welding
 - Arc welding
 - Ultrasonic welding
 - Thermit welding
- Q.2 The maximum flame temperature occurs
- At the Outer Core
 - At the Tip Of Torch
 - At the Inner Core
 - Next to inner core
- Q.3 Acetylene gas is stored in cylinder in
- Gaseous Form
 - Solid Form
 - liquid Form
 - All of the above
- Q.4 In arc welding, electric arc is produced between the work and electrode by
- Voltage
 - Flow of current
 - Contact resistance
 - None of the above

Q.5 Which gas is used while welding steel by MIG?

- a) CO₂ b) Argon
- c) Helium d) Oxygen

Q.6 Chaplets are made by

- a) Metals b) Silica
- c) Wood d) Core Sand

Q.7 The sand used for making Core is

- a) Green Sand b) Dry Sand
- c) Loam Sand d) Oil Sand

Q.8 In hot chamber die casting, the pressure is obtained by

- a) Compressed air b) Steam
- c) Gas d) None of the above

Q.9 Die for wire drawing are made of

- a) Cast iron b) Carbide
- c) Mild steel d) H.S.S

Q.10 Nylon is

- a) Nichrome b) Monoamide
- c) Polyamide d) Adipic acid

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

Q.11 Define thermosetting plastic? Give one example

Q.12 Write the other name of non-pressure welding.

Q.13 Define arc length.

Q.14 What is thermit welding.

Q.15 Name different types of moulding Sand.

Q.16 Write the function of mallet.

Q.17 Define pressure die casting.

Q.18 What is Surface depression.

Q.19 Define trimming.

Q.20 Define roll forging.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

Q.21 Write the advantages of welding.

Q.22 Write a short note on gas welding.

Q.23 Explain resistance spot welding with neat diagram.

Q.24 Explain TIG Welding. With help of diagram in brief?
