

- Q.26 Explain the maintenance of sprinkler irrigation system and its advantages,
- Q.27 Write a short note on multistage centrifugal pump.
- Q.28 Illustrate vertical turbine pump.
- Q.29 Describe surface method of irrigation.
- Q.30 Explain the term of isobaths, water table and draw bath.
- Q.31 Describe different methods of irrigation.
- Q.32 Write a short note on confined and unconfined aquifer.
- Q.33 Write about the terms drop and chute spillway.
- Q.34 Explain the pollution due to poor quality of irrigation water?
- Q.35 Explain the terms evapotranspiration, transpiration ratio and peak period consumptive use?

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Explain the water conveyance structures precast concrete channel section, drop and chute spillway.
- Q.37 Describe subsurface system of water conveyance and their components.
- Q.38 Describe drop and sprinkler irrigation system with their merits and demerits.

Subject:- Farm Irrigation Engineering

/ Water Res. Engg.

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 What is the method to improve duty of water?
- Lining Of Canal
 - Construction of Weirs
 - Construction of Dams
 - Check Dams
- Q.2 With respect of water use efficiency the best method of irrigation means
- Infiltration
 - Evaporation
 - Evapotranspiration
 - Vapour Pressure
- Q.3 Coefficient of storage is a property of _____
- Confined aquifer
 - Unconfined aquifer
 - perched aquifer
 - None of the above
- Q.4 The area where irrigation is must for irrigation is called the _____?
- arid region
 - semi arid region
 - humid
 - None of the above

- Q.5 It is termed as _____ irrigation, because in this type of irrigation, water does not wet the soil surface
- a) surface b) flood
c) subsurface d) none of the above
- Q.6 The process of applying water to the plants is called
- a) Irrigation b) Requirement
c) Duty d) Rotation
- Q.7 Water requirement of crop depends on
- a) Type of crop b) Type of soil
c) Climate d) All of the above
- Q.8 Duty of irrigation depends upon the following factors
- a) type of crop b) climate and season
c) type of soil d) all of the above
- Q.9 In which method, water is spread in the air simulating rainfall?
- a) drip irrigation b) sprinkler irrigation
c) lift irrigation d) flow irrigation
- Q.10 The channel of canal where water flows under the influence of gravity is called _____.
- a) lift channel b) command area
c) warabandi system d) flow channel

(2) 180132/120132/030132
/030154

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 List the source of irrigation water.
- Q.12 Mention two quality parameters of irrigation water.
- Q.13 What is suction head?
- Q.14 What do you understand by degree of saturation.
- Q.15 List the factors affecting frequency of irrigation.
- Q.16 Mention two qualities of irrigation water.
- Q.17 What is semi-confined aquifer?
- Q.18 What is specific capacity of well?
- Q.19 What are the modern methods of irrigation?
- Q.20 What is consumptive use?

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Explain the volumetric method of irrigation.
- Q.22 Describe the classification of pumps.
- Q.23 What are the effects of excessive use of fertilizers on environment?
- Q.24 Describe various factors affecting frequency of irrigation.
- Q.25 Describe the criteria and procedure for selecting of irrigation pump.
