

- Q.25 Describe the types of grinding wheels and their specifications.
- Q.26 Explain the selection criteria for milling cutters.
- Q.27 Describe the lapping process and its applications.
- Q.28 Explain the selection of abrasives for super finishing.
- Q.29 Discuss the gear cutting process using gear shavers.
- Q.30 Explain the role of coolants in gear production.
- Q.31 Describe the advantages of CNC control systems.
- Q.32 Explain the impact of CNC of productivity.
- Q.33 Describe the function of bending dies in forming machines.
- Q.34 Explain the process of arc welding and its defects.
- Q.35 Discuss the importance of coolants in machining processes.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Elaborate on the different types of milling machines and their operations.
- Q.37 Discuss the various welding processes for stainless steel and their applications.
- Q.38 Explain the selection and application of coolants and lubricants in various machining processes.

No. of Printed Pages : 4
Roll No.

180144/120144/030144

4th Semester/ Agri, Auto Subject : Manufacturing Technology-II

Time : 3 Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 What is the primary function of drill chuck?
- a) To hold the drill bit b) To adjust drilling speed
c) To cool the drill d) To measure drill depth
- Q.2 Which milling machine type uses a vertical spindle?
- a) Horizontal b) Universal
c) Vertical d) Planer
- Q.3 What is the main component of a milling cutter?
- a) Shank b) Teeth
c) Flute d) Arbo
- Q.4 What is the primary purpose of gear cutting?
- a) To polish gears b) To shape gear teeth
c) To lubricate gears d) To balance gears

- Q.5 What is a key advantage of CNC machines?
- a) Manual control b) High accuracy
c) Low productivity d) Simple design
- Q.6 Which machine is used for bending dies?
- a) Press brake b) Lathe
c) Milling machine d) Grinder
- Q.7 Which welding process uses a consumable electrode?
- a) TIG b) MIG
c) Spot d) Resistance
- Q.8 Which milling machine type uses a vertical spindle?
- a) Horizontal b) Universal
c) Vertical d) Plane
- Q.9 Which type of drilling machine is portable?
- a) Pillar b) Radial
c) Bench d) Gang
- Q.10 Which process improves surface finish using a fine abrasive?
- a) Lapping b) Milling
c) Turning d) Drilling

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (10x1=10)

- Q.11 Define the term “Boring Bar”.
- Q.12 List two types of drill bits.
- Q.13 What is the function of a planer machine?
- Q.14 Name two types of milling cutters.
- Q.15 Describe the purpose of grinding wheel balancing.
- Q.16 What is the role of honing in finishing operations.
- Q.17 Name one type of gear cutting machine.
- Q.18 What does CNC stand for?
- Q.19 List one advantage of press brakes.
- Q.20 Define the term “Filler metal” in welding.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Explain the types of drilling machines and their applications.
- Q.22 Describe the process of boring in horizontal machines.
- Q.23 Discuss the operations of a vertical milling machine.
- Q.24 Explain the working principle of a planer machine.
