

- Q.25 Explain various functions keys used in Autocad.
- Q.26 Explain various subcommands of properties palette in AutoCAD
- Q.27 Differentiate between:
- Construction Line and Multiline
  - Text and Mtext
- Q.28 Explain Bylayer in brief.
- Q.29 Write various steps for setting the Units for Autocad drawings.
- Q.30 Define Viewport. Name different types of viewports.
- Q.31 Explain the purpose of creating layers in Autocad.
- Q.32 Explain UCS World and what is its importance.
- Q.33 Explain the procedure for creating Block of any object.
- Q.34 Differentiate between Redraw and Regen Commands
- Q.35 Write procedure to import an existing drawing into an open drawing.

#### SECTION-D

- Note:** Long answer type questions. Attempt any two questions out of three questions. (2x10=20)
- Q.36 Describe Design center and how design center is helpful in developing drawings.
- Q.37 Explain various commands to convert the given 2D drawing into 3D drawing with suitable example.
- Q.38 Describe various Zoom tool options in detail.

M.M. : 100

#### SECTION-A

**Note:** Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 In M Line tool editor, symbol tool can be found on which panel.
- Tools
  - Options
  - Insert
  - Formatting
- Q.2 When calling the Extrude tool the following abbreviation can be entered at the command line:
- ex
  - extr.
  - No abbreviation
  - ext.
- Q.3 The Boolean operators-union, Subtract and intersect tools are found in the toolbar:
- Modeling
  - UCS
  - Solids Editing
  - UCS II
- Q.4 A file name with the following extension shows that the file is a raster file:
- \*.dwg
  - \*.dwt
  - \*.bmp
  - \*.dxf
- Q.5 The term UCS stands for:
- User Coordinate State

- b) Using Coordinates Screen
  - c) User Coordinate System
  - d) User Coordinate Set.
- Q.6 Which in your opinion gives the best rendering results.
- a) Medium                      b) High
  - c) Presentation              d) None of the above
- Q.7 The slice tool is used for slicing a 3D solid model into:
- a) Two parts
  - b) Three parts
  - c) Into as many parts as are required
  - d) Four parts
- Q.8 The purpose of the viewpoint Presets dialog is to set a 3D solid model drawing in:
- a) any form of viewing position
  - b) an isometric view
  - c) A perspective view
  - d) an orthographic view
- Q.9 From which of the following toolbars can the Mass Properties tool be called
- a) Modify                      b) Draw
  - c) Standard                  d) Inquiry
- Q.10 The region tool can be called by entering the following abbreviation at the command line when using Dynamic Input:
- a) re                              b) reg
  - c) regi                          d) no abbreviation

## SECTION-B

**Note:** Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 To obtain parallel line, concentric circles and parallel curves \_\_\_\_\_ is used
- Q.12 A \_\_\_\_\_ of a solid is formed where three or more surfaces intersect.
- Q.13 Drawing templates are held in files with the file extension \_\_\_\_\_
- Q.14 An \_\_\_\_\_ of the solid is formed where two surfaces intersect
- Q.15 DWF is an abbreviation for a file extension \_\_\_\_\_
- Q.16 The key F9 toggles on/off \_\_\_\_\_
- Q.17 The Arc tool can be called by entering the following abbreviation at the command line \_\_\_\_\_
- Q.18 Scaling objects make them \_\_\_\_\_
- Q.19 File name extensions for “Raster” File is \_\_\_\_\_
- Q.20 To bring a particular area of the workspace in focus \_\_\_\_\_ command is used.

## SECTION-C

**Note:** Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Describe the uses of variant in Autocad.
- Q.22 Explain absolute co-ordinates.
- Q.23 Explain Subtract and Union commands how they are helpful in developing 3D Autocad commands.
- Q.24 Explain the steps to set angular dimension.
