

- Q.25 Describe the working of double clutch used in tractors. (CO2)
- Q.26 Explain operator seat design? (CO1)
- Q.27 Explain belt pulley drive. (CO2)
- Q.28 Write safe tractor operating procedure. (CO1)
- Q.29 Write tractor maintenance procedure. (CO5)
- Q.30 Draw the layout of excavator. (CO4)
- Q.31 Write the application of Fork lift Truck. (CO4)
- Q.32 Classify tractor tyres and give their application. (CO3)
- Q.33 Describe the need of reduction gear mechanism. (CO1)
- Q.34 Explain position control system. (CO2)
- Q.35 Draw the layout of independent drive PTO shaft. (CO2)

SECTION-D

- Note:** Long answer type questions. Attempt any two questions out of three questions. (2x10=20)
- Q.36 Explain various components of hydraulic system and write their functions in details. (CO2)
- Q.37 Explain layout, working and application of Dozer. (CO4)
- Q.38 Explain the functions of major assemblies of tractor in detail. (CO1)

No. of Printed Pages : 4

Roll No.

180362A/170362A

/120362/030362

6th Sem / Auto

Subject:- Tractor & Special Purpose Vehicles / Tractor & Earth Moving Machy.

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 What is the principal aim of tractor testing? (CO5)
- To make available the data on power output and performance of the tractor
 - To sell the tractor
 - To move the tractor
 - To open the tractor
- Q.2 Maximum torque in a tractor is generated
- Rated rpm
 - Less than rate rpm
 - Rated hp
 - Maximum Idling
- Q.3 _____ is a self propelled machine which is used mainly to exert a powerful tractive force force pulling other machines / equipment. (CO1)
- Tractor
 - Bulldozer
 - Angle dozer
 - Scraper
- Q.4 What is the function of the flow control valve? (CO2)
- Controls the direction of flow of oil
 - To pump hydraulic oil to the hydraulic circuit

- c) It converts the mechanical energy to hydraulic energy
 d) It controls the pressure of flow of oil
- Q.5 How many types of lift control levers are present in hydraulic systems? (CO2)
 a) One b) Two
 c) Three d) Four
- Q.6 Which component of a hydraulic system is used to store the sufficient amount of hydraulic oil? (CO2)
 a) Rotatory pumps b) Oil reservoir
 c) Flow control valve d) Pressure gauge
- Q.7 Which type of system uses 'Oil under pressure' means for power transmission? (CO2)
 a) Fluid power system b) Hydraulic system
 c) Pneumatic system d) Stepper motors
- Q.8 Heavy smoking in an engine in operation may be due to (CO5)
 a) Overloading b) Mixtures
 c) Late injection d) all of these
- Q.9 One hp is equal to (CO1)
 a) 246 watts b) 250 watts
 c) 746 watts d) 1000 watts
- Q.10 The violent noises heard in an engine during the process of combustion after the piston has passed over the top dead centre is known as? (CO5)
 a) Stationary b) Spark ignition
 c) Detonation d) all of these

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 The force developed in hydraulic systems in high pressure is due to ____ (High Pressure / Less pressure) (CO2)
- Q.12 What is the full form of T.C.U? (CO2)
- Q.13 Write the specification of wheel used in tractor. (CO3)
- Q.14 Name the hydraulic pump that is mostly used in tractor. (CO2)
- Q.15 Define earth moving machinery. (CO4)
- Q.16 Define parallel pull. (CO1)
- Q.17 Define tread. (CO3)
- Q.18 Upward motion to lift the load with the help of wire in crane is called ____ (CO4)
- Q.19 Track type tractor is also called as ____ tractor. (CO1)
- Q.20 Give the function of final drive? (CO1)

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Write the applications of special purpose tractors. (CO4)
- Q.22 Explain different types of engines used in tractor. (CO1)
- Q.23 Compare dual tyres with tandem tyres. (CO3)
- Q.24 Explain the working of draw bar? (CO2)
