

- No. of Printed Pages : 4 180565/120565/030554A
Roll No.

Time : 3Hrs.

M.M. : 100

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 The ingredient of paint which gives it, the binding property and responsible for opaque coating is?
- a) base b) solvent
c) filler d) formalin
- Q.2 What class of coatings is generally not damaged by freezing temperatures?
- a) solvent based coatings
b) water based coatings
c) Varnish coatings
d) oil based coatings
- Q.3 Which of the following is the most durable varnish?
- a) water varnish b) Spirit varnish
c) oil varnish d) turpentine varnish
- Q.4 What are the main constituents of varnishes?
- a) resins & benzene b) resins & toluene
c) resins & water d) resins & drying oil
- Q.5 Which of the following is not a solvent or thinner used in paint formulation?

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 What is paint failure? Discuss important types of paint failure along with the various remedial measures in details?
- Q.37 What is electroplating? Describe the process of electroplating in detail with the help of a neat diagram?
- Q.38 Discuss the importance of pigment in paint formulation? Explain important properties of a good pigment for paint formulation in detail?

- a) Spirit b) Poppy oil
c) Lead acetate d) Petroleum
- Q.6 The solution which is used for electroplating is called?
- a) solvent b) water
c) oil d) electrolyte
- Q.7 The water based paints are mainly formulated by which of the following techniques?
- a) centrifugation b) dispersion
c) adsorption d) absorption
- Q.8 Which of the following resins to be used in varnish formulation where a faster dry and harder finish is required for maximum water resistance?
- a) resorcinol resins b) urea resins
c) phenol resins d) melamine resins
- Q.9 What does 'blistering' represents?
- a) tool for applying paint
b) tool for preparing paint
c) paint defect
d) none of the above
- Q.10 Which of the following is used as vehicle in oil based paints?
- a) Spirit b) linseed oil
c) mustard oil d) silicone oil

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 What are Lacquers?

- Q.12 What is the name given to the component of paint, which evaporates when it is applied on the surface?
- Q.13 Write the name of a type of paint which releases volatile organic compounds during its curing?
- Q.14 What is electrochemical equivalent?
- Q.15 What is the name given to the compound added during paint formulation, which makes paint to adhere the surface on which it is applied?
- Q.16 Write the name of a white pigment used in paint industry.
- Q.17 Define the tinting strength.
- Q.18 Write the name of any one type of dispersion equipment used for manufacturing paints?
- Q.19 What is Putty?
- Q.20 What is the name given to the component of paint, which slowly oxidizes to form a dry pigmented film?

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Discuss the process of electrode deposits in brief.
- Q.22 What are the characteristics of a good varnish?
- Q.23 Discuss the water based paints in brief?
- Q.24 Explain the pigment volume concentration in brief.
- Q.25 Discuss the need and importance of surface coatings in brief.
- Q.26 Describe the different constituents of varnish in brief.
