

- Q.33 Explain in brief the working of rotary cutter.
 Q.34 Explain in brief the working of paper reel.
 Q.35 Write the main differences between calendering and supercalendering.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Explain with neat sketch the working and arrangement of multi cylinder dryers used in kraft paper mills.
 Q.37 Explain the reason for the removal of condensate from the dryer shell. Also explain with neat sketch the working of rotary siphon.
 Q.38 A paper machine is producing 100 tonne / day paper with 8% moisture content. If cy at different sections are as follows :
 Head box cy = 1%
 After couch roll = 18%
 After Press section = 35%
 Calculate the amount of water removed at the wire part, dryer section and water evaporated at the dryer section.

No. of Printed Pages : 4

180654/120654/030665

Roll No.

5th Sem / P&P

Subject:- Paper Making - II

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 How is heating done in cylinder dryness?
 a) Conduction b) Convection
 c) radiation d) all
- Q.2 Mass transfer occurs due to
 a) Potential difference
 b) Temperature difference
 c) Concentration difference
 d) All
- Q.3 Diameter of a dryer cylinder in multiple dryer section is
 a) 9 to 12 ft b) 6 to 9 ft
 c) 3 to 6 ft d) 1 to 3 ft
- Q.4 Unit of basis weight is
 a) $\frac{\text{kg}}{\text{m}^2}$ b) $\frac{\text{gm}}{\text{m}^2}$
 c) $\frac{\text{kg}}{\text{cm}^2}$ d) $\frac{\text{gm}}{\text{cm}^2}$
- Q.5 Function of dryer hood is to
 a) describe drying efficiency

- b) Increase drying efficiency
 - c) No effect on drying efficiency
 - d) Deteriorate working environment
- Q.6 A paper ream consists of
- a) 2000 sheets b) 1000 sheets
 - c) 500 sheets d) 100 sheets
- Q.7 Calendering is used to increase
- a) gloss b) smoothness
 - c) roughness d) moisture
- Q.8 Supercalender in a stack consists rolls of
- a) fibrous
 - b) metal
 - c) alternate metal and fibrous rolls
 - d) none
- Q.9 To increase drying efficiency enclosure used around dryer section is-
- a) dryer hood b) reel
 - c) calender d) ventilation system
- Q.10 Sweaty dryer function is
- a) drying b) wetting
 - c) softness d) Hardness

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Write the main function of babydryer.
- Q.12 Define barometric leg.
- Q.13 Write the function of spring roll.
- Q.14 Write the function of rope carrier.

(2) 180654/120654/030665

- Q.15 Name any two industrial paper.
- Q.16 What is the function of dryer hood system?
- Q.17 Write the main reason that cause paper blackening.
- Q.18 Define relative humidity.
- Q.19 Define term cockling.
- Q.20 What is the main function of siphon used inside cylinder dryer.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Explain in brief the working of supercalendering.
- Q.22 Write the advantages of closed hood over open hood system.
- Q.23 Explain in brief the working of yankee of M.G. dryer.
- Q.24 Explain stationary siphon in brief.
- Q.25 Define drying. Also explain the need of drying.
- Q.26 Explain with neat diagram the constant rate and falling rate drying.
- Q.27 Explain Pocket ventilation.
- Q.28 Explain in brief the working of embossing machine with neat diagram.
- Q.29 Explain in brief the manufacturing process of kraft process.
- Q.30 Explain in brief the manufacturing process of hand made paper.
- Q.31 Explain in brief the working of any one glittter.
- Q.32 Write short note on winders and rewinders.

(3) 180654/120654/030665
