

- Q.6 Nominal concrete is used when the concreting is to be performed for_____ (CO5)
- ordinary work
 - special work
 - RCC work
 - both a & c
- Q.7 To provide resistance against the entry of capillary water, we can use_____ admixtures (CO6)
- retarder
 - plasticizers
 - accelerator
 - damp proofers
- Q.8 Cement when comes in contact with hot water results in_____ (CO7)
- initial setting
 - final setting
 - flash setting
 - both a & c
- Q.9 The last and final operation of finishing is called (CO8)
- Compaction
 - trowelling
 - Finishing
 - stripping
- Q.10 The standard size of concrete mould is (CO9)
- 15 cm
 - 20 cm
 - 25 cm
 - both a & b

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Unit weight of PCC_____ (CO1)
- Q.12 Strength of concrete _____ with age. (CO1)
- Q.13 Larger size of aggregate _____ is the cement required (CO2)

(2) 180741/170741/120741
/030741

- Q.14 Water cement ratio is expressed in_____ (CO3)
- Q.15 When the concrete is subjected to sustained loading, the deformation is called_____ (CO4)
- Q.16 Grade lower than M30 should not be used in post tensioning works. (True/False) (CO5)
- Q.17 Admixtures increase durability. (True/False) (CO6)
- Q.18 In hot weather concreting accelerators are used. (True/False) (CO7)
- Q.19 Curing _____ strength of concrete. (CO8)
- Q.20 Concrete can be tested only in hardened stage. (True/False) (CO9)

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Explain the properties of concrete in green and hardened stage. (CO1)
- Q.22 Write down the properties of C_4AF & C_3A (CO2)
- Q.23 Name the different type of cement as per standard codes? (CO2)
- Q.24 Explain the Duff Abram's rule? (CO3)
- Q.25 State various factors that affect the workability of concrete. (CO4)
- Q.26 Write a short note on properties of concrete in hardened stage (CO4)
- Q.27 Write a short note on Grade of concrete and characteristic strength. (CO5)
- Q.28 Differentiate between nominal and controlled concrete mix. (CO5)

(3) 180741/170741/120741
/030741
