

- Q.26 What is IEEE standard 802.3? Explain its working principle.
- Q.27 What are the different classes of IP addressing?
- Q.28 Write various applications of Bluetooth?
- Q.29 Explain the various elements of Computer Networks?
- Q.30 Briefly explain any two troubleshooting tools.
- Q.31 Differentiate between subnetting and super netting.
- Q.32 Write short note on (a) Gateway (b) Cryptography.
- Q.33 Explain circuit Switching with its merits and de-merits.
- Q.34 What do you understand by transmission modes? Explain types of modes of transmission.
- Q.35 Differentiate between Peer to Peer and Server Client network model.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Compare IPV4 and IPV6 in detail.
- Q.37 Explain IP addressing in detail.
- Q.38 Explain different types of Networking Topologies.

No. of Printed Pages : 4
Roll No.

180851/170851/

5th Semester/ Comp., IT, GE Subject : Computer Networks

Time : 3 Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 How many bits are there in the IPv4 address?
- a) 64 bits b) 48 bits
c) 32 bits d) 16 bits
- Q.2 Which one of these is not a class of IP addresses?
- a) Class A b) Class F
c) Class E d) Class B
- Q.3 What does NIC stand for?
- a) Network Internet card
b) Network Interface card
c) National Internet code
d) Network Internet connection
- Q.4 A device that connects networks with different protocols is _____.
- a) Switch b) HUB
c) Gateway d) Proxy Server

- Q.5 In which topology, there is only one single path for transmission of data?
- a) Bus topology b) Ring Topology
c) Star Topology d) Tree Topology
- Q.6 Which network topology requires a central controller or hub?
- a) Star b) Mesh
c) Ring d) Bus
- Q.7 In classless addressing, there are no classes but addresses are still granted in ____.
- a) IPs b) Blocks
c) Codes d) Sizes
- Q.8 HTTP is a _____ protocol.
- a) Transport layer b) Application layer
c) Network layer d) DLL
- Q.9 TCP/IP model does not have _____ layer but OSI model have this layer.
- a) Session layer b) Transport layer
c) Application layer d) Network layer
- Q.10 The term WLAN stands for ____.
- a) Wide Local Area Net
b) Wide Local Access Network
c) Wireless Local Area Network
d) Wide Land Access Net

(2)

180851/170851/
120851/030851

SECTION-B

- Note:** Objective/ Completion type questions. All questions are compulsory. (10x1=10)
- Q.11 Connection oriented service is less reliable than connection less. (True/false)
- Q.12 TCP/IP stands for ____.
- Q.13 Full form of FTP is ____.
- Q.14 Masking is used in sub netting. (True/false)
- Q.15 The IP address “192.88.99.0” belongs to _____ class.
- Q.16 The full form of IEEE is ____.
- Q.17 In 10 Base T, the T represents to ____.
- Q.18 OSI model has ____ layers.
- Q.19 ISDN stands for ____.
- Q.20 Wifi stands for ____.

SECTION-C

- Note:** Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)
- Q.21 Compare LAN, MAN and WAN on speed of transmission, reliability, design complexity ownership & scale.
- Q.22 What are the functions of each layer of TCT/IP model?
- Q.23 What do you mean by Modem and explain its types.
- Q.24 What is IP addressing? Explain the IP Address format.
- Q.25 Explain various principles of network security?
