

- Q.27 List various Big Data tools.
- Q.28 Explain the structure of Hadoop?
- Q.29 What are the main functionalities of the Name Node and Data Node in Hadoop?
- Q.30 What is Distributed File System? Explain in brief.
- Q.31 List the strengths and weaknesses of map reduce.
- Q.32 Explain the steps of the Map Reduce word-count example, from loading data to the final output.
- Q.33 Explain the uses of Pig.
- Q.34 Describe how hive differs from traditional relational database management systems (RDBMS).
- Q.35 Define Big Data and discuss its main characteristics.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 What is Hadoop. Explain structure of Hadoop in detail.
- Q.37 Explain the following:
- | | |
|---------------|-----------|
| a) Map Reduce | b) Hadoop |
| c) Pig | d) Hive |
| e) R | |
- Q.38 Illustrate main features and architecture of Hive with neat diagram.

No. of Printed Pages : 4
Roll No.

180854B/170854B

5th Semester/ Comp Subject : Big Data

Time : 3 Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Which of the following is NOT a characteristic of Big Data?
- | | |
|------------|---------------|
| a) Variety | b) Simplicity |
| c) Volume | d) Velocity |
- Q.2 What are the main components of big data?
- | | |
|---------------|---------------------|
| a) HDFS | b) YARN |
| c) Map Reduce | d) All of the above |
- Q.3 _____ is the world's largest Hadoop cluster.
- | | |
|-------------|----------------------|
| a) Apple | b) Datamatics |
| c) Facebook | d) None of the above |
- Q.4 Pig operates in how many modes?
- | | |
|---------|----------|
| a) Zero | b) One |
| c) Two | d) Three |

- Q.5 Hadoop is primarily used for _____.
 a) Word processing
 b) Big data storage and processing
 c) Image editing
 d) Web browsing
- Q.6 How do you create a table in Hive?
 a) Create database b) Create table
 c) Make table d) New table
- Q.7 Data in ____ bytes size is called Big Data.
 a) Meta b) Giga
 c) Peta d) Tera
- Q.8 RDBMS stands for _____.
 a) Red Database Management System
 b) Relation Database Management system.
 c) Read Database Management System
 d) Regular Database Management System
- Q.9 Which of the following platforms does Hadoop run on?
 a) Bare metal b) Debian
 c) Cross-platform d) Unix-Like
- Q.10 Input of the _____ is the sorted output of the mappers
 a) Reducer b) Mapper
 c) Shuffle d) All of the mentioned

SECTION-B

- Note:** Objective/ Completion type questions. All questions are compulsory. (10x1=10)
- Q.11 Java is commonly used to write Map Reduce programs in Hadoop.
- Q.12 Array is one dimensional. (True/False)
- Q.13 Full form of NAS is _____.
- Q.14 Name one component of the Hadoop ecosystem.
- Q.15 Who created the R programming language?
- Q.16 The full form of HDFS is _____.
- Q.17 Name two Hadoop vendors.
- Q.18 Define Array.
- Q.19 Hadoop is a Virtual Framework. (True/False)
- Q.20 Yarn is one of the components of Big Data. (True/False)

SECTION-C

- Note:** Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)
- Q.21 List various benefits of Big Data.
- Q.22 Explain how to get data in “R”.
- Q.23 List different sources of Big Data.
- Q.24 Explain the working of Map Reduce.
- Q.25 List 5 daemons of Hadoop.
- Q.26 What are the challenges for processing Big Data?
